Experience in Web Services Testing using SOAP UI and SOA Test
Attending Sprint Retrospective meetings and discussing about Dos and Don?ts.
Attending Team meetings and discuss the best practices with Peers and Supervisor.

- **HCL Technologies** as Software Testing Engineer
  Jul 2015 to Feb 2017

Client : Aetna Health, Chicago
Project : Radiology Information Systems
Role :Software Test Engineer
Tools Used :Jira
Testing Approach : Manual and Automation
Duration : July 2015 to February 2017

Description:

Aetna is one of the leading healthcare benefits companies, providing innovative health benefit plans and providing insurance on laboratory equipment to the major multi-specialty hospitals in US. The Project is all about maintaining the listings and insurance details of the insured equipment. Testing was being carried out on the Radiology equipment details and the respective tenures listed in the website.

Responsibilities:

Understanding the Project by reviewing the BRS document
Coordinated with Project management to understand client specifications
Understanding the requirements specification by reading FRS document
Contribution to Test Plan Documentation
Preparing the test cases based on requirement specifications
Exposure to test scripts using Selenium WebDriver (java)
Deriving Test Scenarios, Documenting Test cases and Collecting Test data for functional testing
Giving the mandatory information about the defect to the developers in order to fix it
Performing Retesting, Regression Testing and Functional Testing on modified software builds
Team communication and customer communication

- **Hitachi Consulting** as Software Engineer
  Dec 2013 to Jul 2015

Client : Allstate Insurance
Project : Customer Care and Billing
Role : Software Engineer
Environment : Java, JSP, HTML, SQL Server
Tools Used : Jira
Testing Approach : Manual
Duration : December 2013 to July 2015

Description:

In United States, Allstate is one of the largest insurance provider and a brand that is well known for being trustworthy. The Billing module is responsible for creating both the monthly and the final bill. It converts the usage charges into billed charges and calculates the customer's current balance taking into account adjustments, credits and charges. It also prepares the bill for printing and updates the customer's account. The data for the billing process is stored in near-ready format so that billing can run in the shortest time possible. This means that all of Billing's input applications will have data ready at billing run. Because Billing is the last module to affect what a customer receives, a QA team audits the process. Billing provides sample bills for the auditing process.

Responsibilities:
Understanding the Project by reviewing the BRS document.
Understanding the requirements specification by reading FRS document.
Preparing the test cases based on requirement specifications.
Preparing and maintaining the Requirement Traceability Matrix.
Performing Sanity Testing.
Performing Retesting, Regression Testing and Functional Testing
Involved in preparing test plan, test strategy, and test analysis report
Giving the mandatory information about the defect to the developers in order to fix it.
Communicate with other team members in order to resolve the issues.
