Work Experience

Bhilwara Infotechnology Ltd. was last company as Technical Consultant
Sep 2018 to Till Date

SAP Ariba Developer and L4 Technical Support Engineer

Bhilwara Infotechnology as SAP ARIBA Developer
Sep 2018 to Oct 2020

Worked as Developer as well as L4 Technical Support Engineer on Ariba Buyer 9r1 Application.

Wirpo Technologies as Application Lead
May 2010 to Aug 2012

Role and Responsibilities
Understood the Business Requirement Document.
Prepared the Design / Technical Document to implement BRD.
Prepared the detailed report about how many Tasks would be involved to implement the Project and an estimation of time taken for each of the tasks along with their priority of implementation. On a whole it should have details of schedule of the Project. It also includes time (hrs) to review and assess the completion of the Tasks both internally and by the Client.
Calculate the man hours in terms of Cost and present the details to Senior Manager to discuss about the feasibility of the Project.

Implemented Project as per schedule, made appropriate changes when needed and got approval from the Senior Manager before getting it approved by Client.
Provide the Client about the updates or progress made in implementation of the Project on a weekly basis through WSR (Weekly Status Report).
Ensure the acceptance of the Client at each stage of completion of the Tasks while scheduling a meeting.
Once the development of the Projects completes had to do a thorough testing of not only whether it meets the Clients Requirements but also the Application on a whole.(Unit Testing and Integration Testing).
Get the Consent from the Client to move the code to QA Environment from Dev.
Prepare Test Cases as per the Business Requirement and take a report of Testing done internally by our Team members.
Make changes or do bug fixing if any of the bugs are found while testing the application internally or for any unplanned changes requested by Client.
Send a copy of the Test Cases file to the Client for them to evaluate/test the Application in QA Environment.
Bug Fixing in case of any defects found by the Client, review the code, make changes in Dev Environment and again move the code to QA (this step to be followed in case of any defects are found.)
Once the Client does the testing again and find its completely acceptable to the Business then ensure a smooth Go Live (moving the code from QA to Production Environment)

Client: Sony Electronics Ltd. Duration: May 2010 to June 2011
Creation of Integration Event ? to load data in the format of CSV file from external application into an Approvable in Ariba Buyer.
Modifying Approval Rule ? as per the changes happened in the Approvable.
Creation of new E-Form as per Business Requirement and creation of its own Approval Rule
Submit Hook ? Created a Submit Hook Java class to incorporate a condition while submitting the Approvable
Reports - Creation of new Report in Ariba Buyer.
Test Cases ? Created a Test Case document based on the Business Requirement
Data related to Requisitions, E-Forms, Consumption Order, etc to be collected through Ariba Buyer Inspector by exporting to Excel file.
Created a new standalone Java Class to convert Excel file to a file of Pdf format and as per the Client requested format.

Client : Wal-mart Duration: July 2011 to September 2011
Data related to Requisition, Consumption Order, etc of the Ariba Buyer Application to be collected in the format expected by the Client.

Ariba Technologies India Pvt. Ltd., as Product Solutions Engineer
Dec 2007 to Oct 2009

Was involved in Tier 3 Technical Support.
Handled both Technical and Functional issues of the Ariba Sourcing Application through Service Requests (Siebel)
Analyzed logs, Thread dumps, CPU Usage/ graph to identify the cause of the performance issues.
Dealt with Installation of the Application and configuration of the Application with Web Server, Application Server and the Database
Dealt with Integration of the Sourcing Application with other Ariba Applications.
Replicated the issues to identify them as defects/bugs in the code.
Identified and provided workarounds to the Customers.
Identifying issues as Defects, Enhancements and logging Change Requests and Enhancement Requests for the same.
Assisted Engineering team by providing the details of the possible cause of the issue.
Involved in interactions internally with Engineering, QA, own team, US Team and externally with Customers and Ariba Consultants.
