## Summary

Capable MuleSoft Developer with total 5 years of experience in IT Industry operations. Over 3.5 years of experience in MuleSoft Development. Proficient in best practices and employee motivation to boost productivity and job performance. Well-coordinated in addressing problems, investigating root causes and implementing successful resolutions.

## Work Experience

### Capgemini as Consultant

Sep 2018 to Till Date

Building mobile application and website for better customer experience and improved

security, BOI uses two factor authentication for login & for all other transactions using MuleSoft as Integration layer. And migrating customer data from legacy systems to latest authentication servers using Mule ESB.

Restful API Development using MuleSoft. Writing Munit test cases for application. Worked on DataWeave. Hands on experience with CICD process for Continuous Integration and Continuous Deployment. Developing RAML in Design Center (Anypoint Platform). Managing APIs using Anypoint Platform(Publishing APIs in Exchange, Applying policies in API manager, API Deployment from Runtime Manager).

Sonar Scan of built APIs for code quality. Worked on Test Script Automation using Newman Cli. Worked with Scrum/Agile development approach.

### CGI Inc., as Associate Software Engineer

Nov 2015 to Aug 2018

Project 1: CHARM - From 11/16 to 5/18 Client : KTC(Kapsch TrafficCom) Netherlands

Description: CHARM stands for Common Highways Agency and Rijkswaterstaat Model. CHARM program defines a new generation functionality for traffic systems in traffic control centers. CHARM want to buy this functionality through a single existing software package which it is integrated, flexible and scalable. It uses Mule ESB as integration layer for integrating Traffic Management Center and Traffic management road side appliance.

Application Development using Mule ESB and Java. Used core java concepts like Collections, Generics, Exception handling to develop business logic. Writing Munit test cases for application. Worked on DataWeave. Hands on experience with ORM tool Hibernate. Used JMS for Asynchronous and Synchronous messaging. Worked on integrating multiple traffic

management systems with roadside devices. Worked with agile development approach.

Project 2 : Polo Nordic and EDI Validation (POP) - From 3/16 to 10/16 Client : Postnord Sweden

Description: Nordic EDI and Validation is basic implementation of the POP (Production Order Processor). POP consists of two components: the Pre-processor and the Validator. The Pre-processor splits each INPO message into individual Consignments. The Validator then processes each individual Consignment. If any errors occur in either the Preprocessor or Validator, a System Log message is created and sent to EMS, describing the nature of the error.

Roles and Responsibilities: Validation of input messages using Java . Writing Unit Test cases using EasyMock framework. Fixing of Sonar Major Issue.

Education

UG: **B.Tech/B.E. (Electronics/Telecommunication)** from **Jammu University** in **2015**

Other Qualifications/Certifications/Programs:

- MCD - Integration and API Associate (Mule 3.9)
- Developer - Level 1 (Mule 4.0)
