Projects

Project Title: Devops Enabler Project
Client: Suresh
Nature of Employment: Full Time

Duration: Jun 2020 - Till Date
Onsite / Offsite: Offsite
Team Size: 3

Skill Used: Nodejs, Reactjs, Git, Javascript, MongoDB

Project Details: We are building a application which can be used for assessments of projects at enterprise level. The application will be a package which can be downloaded from the registry of DevOps Enabler. Once the application is downloaded, we will provide the required steps for installing the application in a VM / server at the client location. Whenever a new feature is added, we will give the option to upgrade. On clicking on the upgrade button in the application, the application should pull the recent image from the registry and will update. The new features that are added to the application will have a label New. In case of any updates, the existing data of the clients / edits done by the client should not get over written.
