## Summary

Professional Java Software Developer with 3.5 years of experience in the business development process.

Involved in creating new functionalities from scratch and delivering the full fledged it to client on time.

## Work Experience

### TCS as IT Analyst -Java

Feb 2017 to Till Date

#### Achievements/Tasks

The scope of the current project (ION Digital Campus Solution) was to provide a suite of offerings that supports academic and administrative processes.

The Student Life cycle module digitizes a student's life cycle processes, including admission, fee, timetable, attendance, exam and grading, library, transport, and hostel services. It provides a holistic view of the transactional history of a student in a single screen, from the time of admission till separation.

Working as a backend developer of Java utilizing Java Eclipse IDE which involves mysql database to create new functionalities/features for the client as well as improving performance of existing features of the application.

Developed an efficient integrated feature of pulling students' data from a different solution to our solution while student is getting admitted in the college.

Built a Java web service of student creation or updating the data while hitting the url and to provide a JSON structure in return of each student to user to view in the report.

Participated in business calls to get and understand the requirements in Agile methodology and was responsible for creating/updating user stories on Devplus for every sprint.
