Summary

7.09 years of the total experience of expertise in ETL/SSIS packages to extract data from various sources like Excel, Flat files to SQL Server systems using different SSIS components and used dynamic configuration files and variables for production deployment. Hands-on experience with analysis, design and development of client/server, web-based and n-tier application. Developed, deployed and monitored SSIS Packages for new ETL Processes and upgraded the existing DTS packages to SSIS for the on-going ETL Processes. Performed and fine-tuned Stored Procedures, SQL Queries and User Defined Functions. Knowledge of SSRS reports and deployment of reports on the server. Strong ability in defining query for generating drill down reports, handling parameterized reports and creating stylish report layouts in SSRS 2017.

Work Experience

• **RSi Retail Solutions India Pvt. Ltd** as Production Operations Specialist
Jun 2018 to Till Date

Founded in 2003, Retail Solutions Inc is a software company based in Mountain View, CA that provides software-as-a-service products for data management, reporting and business intelligence, and point of sale applications. RSi was named by Forbes as the biggest SaaS company you've never heard of.

It is a project of in-house ETL process which process large data within a couple of hours. Application receive data from various sources like SFTP location, Files in email, Downloading files through robots etc.

Creating SQL solutions to address the problem/issue.

Create SSIS packages & other SQL components to enhance production environment.

Develop & release applications to Production with SOP Documentation.

Manage and track all the release progress on JIRA.

Track the development/enhancement for completion in assigned in time.

Identify & plan for the enhancement to optimize.

Day-to-day task allocation for team and providing technical help to team in every manner.

Prepared

RDP Monitoring email

Cube Scan automation

Data Quality for silo

SDD (Standart Data Delivery) process

Management Reports

Developed SQL code for tracking and notifying job failure

Write store procedure & User defined function for day-to-day activities

Created SSIS package to audit the Production server and schedule e-mail to themanagement.

Developed SSIS packages using Transfer Database Task, Execute Process Task, Execute Package Task

Created SSIS packages which execute batch files or SQL script.

Created QA SSIS package using transformations like derived column, row sampling, aggregate, lookup transformation etc.

Troubleshooting SSIS packages for supporting change in file format or data format.

Creating, modifying store procedures, functions and T-SQL server 2017

Importing and exporting data form various sources through various ETL processes

Important

- Using Free CV Search you have access to featured candidate profiles of Naukri. You can browse through the profiles and email the candidates of your choice directly using the email option provided. To prevent misuse of candidate information, contact details and attached resume of the candidates have been withheld.

Importing and exporting data from various sources through various ETL processes.
 Solving data issues like Duplicity, Failures, Null values and reprocessing it using SQL scripts in order to ensure data is correct.
 Making internal as well as external communication for keeping everyone on same page.
 Keep track of application rotation for keep team crosstrain.
 Highlights
 Received appreciation mails from client for quick and on the fly troubleshooting
 Received appreciation for RCA for Job Failure tickets (From 140 to 35 per month in just 2 months)
 Prepared handy excel files for quick QA

Cybage Software Pvt. Ltd. as Technical Support Engineer
 Mar 2016 to Jun 2018

GroupMis a resource provider to media and entertainment data management Company. Project is about processing various forms of data (xls, csv, txt, Facebook, Twitter, YouTube and many more) received through various types of data sources and generate reports for analysis, performance which help for business related decision, investments, statistics etc.
 It is data warehouse project which acquires data through various sources, extracts, transforms and loads into required reporting format (ETL).
 The GroupMDatamart is a proprietary solution that allows agencies to build and maintain client application in a structured, efficient and robust manner whilst providing the flexibility required to meet client-specific reporting needs.
 Created ETL Packages using SSIS using various control flow task and data flow transformation.
 Data Analysis with the help of SQL queries and QA of data at each step with the Raw file to check the correct data and its consistency.
 Created SSIS Packages for integrating data using OLEDB connection from heterogeneous sources (Excel, CSV, Oracle, flat file, Text format data) by using multiple transformations provided by SSIS such as Data Conversion, Conditional split, Bulk insert, merge and union all.
 Prepare RCA of spotted issue and resolve them within agreed time line.
 Developed reports for business end users using report builder with updating statistics in SSRS
 Developed various operational drill-through and drill-down reports using SSRSProcessing daily, weekly and monthly data for various applications in Datamart through AETL process.
