Client: govt of India NUIS

It's an online learning platform for students who wants to take online courses according to their state board curriculum. The can enrol by free. Providing a horizontal learning and knowledge sharing platform for exchange between cities practitioners, academia, researches and technologists .

My Roles in Details :

I joined this project as a software engineer and during my 18month work span I have worked on various features on the project. Among them integration of the. Along with that a new Booking Engine I had developed for this product which is a newer version with new looks and feels. I was provided with the static HTML code and I used my jQuery and JavaScript skills to make it dynamic. Along with that I have added a search API which searches through the inventory and shows the available course to the Student.

Apart from this frequent bug fixes are done along with changes to the old scripts by making them more efficient and better oriented. Also deprecated codes are removed and new formatted code is put on. I have also worked on multiple reports based on the client requirement and delivered them for the product.

Responsibilities:

- * Using reactjs
- * Used advanced level of HTML, JavaScript, CSS and pure CSS layouts (table less layout)
- * Used Dreamweaver CS3 for designing pages
- * Defined and developed the application's presentation layer using HTML, CSS, JavaScript Scripting,Reactjs.
- * Handled all Client side validation, dropdown menus, tab navigation, client side sorting using JavaScript

- * Designed the pages that were compatible with all the browsers
- * Redesigned pages to improve application design and UI to increase response time
- * Designed Templates and Flow of future pages using Adobe Photoshop CS6
