JQuery, Maven, Eclipse, Tomcat 6.0, My SQL6.0.

Wipro Technologies as Senior Project Engineer

Aug 2015 to Nov 2017

Project 1:

Client - State Street

07/2016-11/2017

Project- FICOMS (Fixed Income Central Order Management System)

Senior Developer

FICOMS is an order management system that tracks fixed income buying and selling of orders from Transition Management and Institutional Clients. It collects relevant security master and pricing data from Bloomberg Data Services.

It also tracks bids from potential counterparties for each order:

Major functionality FICOMS provides is:

Bulk order upload facility

Order trading facility with different external trading system (TSOX, LVTS, Market Access)

Creating client side trade ticket by applying company markup on the street side price

Reporting trade to different external clearing system

Reporting trade information to different State Street internal systems

Responsibilities:

Coding assigned task.

Debug code as per assigned bugs.

Write query and determine the query performance.

Participated in staff meetings and team meetings.

Worked closely with business analysts in understanding the technical requirements of each project and prepared use cases for different features and designs.

Managed all aspects of the web application, including maintenance, testing, debugging, deployment and printing

Environment:

Windows XP, Jdk1.6, Spring 3.0, JDBC, Servlet3.0, JSP2.2, Rest Web Services, Java Script, J Query, Maven, Eclipse,

Tomcat 6.0, My SQL6.0.

Project 2:

Client -Ericsson

09/2015-06/2016

Project- NMA

Senior Developer

NMA is a common MIB Adaptor that uses NM as a library to connect with Network Elements and CS to store data. This Adaptor is generic to SGSN and COM/ECIM nodes. NMA uses MIM definitions provided by WRAN MOM to know the data to be discovered from the network element and sends requests towards the node to discover MO's. There is at least one NMA MC available on every server. The number of instances can be configured if support for PICO, TCU or G2 nodes is required.

Responsibilities:

Coding assigned task.

Debug code as per assigned bugs.

Write query and determine the query performance.

Participated in staff meetings and team meetings.

Worked closely with business analysts in understanding the technical requirements of each project and prepared use cases for different features and designs.

Managed all aspects of the web application, including maintenance, testing, debugging, deployment and printing

Environment:

Windows XP, Jdk1.6, Struts 2.0, Hibernate 3.0, Servlet3.0, JSP2.2, Rest Web Services, Java Script, J Query, Ant Script,

Maven, Eclipse, JBoss6.0, My SQL 6
