

Abhishek Pandey

Data Engineer seeking roles in Data Science, Data Analytics, Machine Learning, Data Analysis, Project Planning, Process Improvement, Requirement Gathering, Statistical Analysis, Predictive Modelling, Risk Analysis, Python, Hive, MongoDB, KSQL, Cassandra, Redis

Current Designation: Data Engineer	Total Experience: 5 Year(s) 0 Month(s)
Current Company: Digitaleast Gmbh	Notice Period: 1 Month
Current Location: Bengaluru / Bangalore	Highest Degree: PG Diploma [Data Science]
Pref. Location: Bengaluru / Bangalore, Delhi / NCR, Mumbai	
Functional Area: IT Software - Application Programming / Maintenance	
Role: System Analyst	
Industry: IT-Software/Software Services	
Marital Status: Single/unmarried	
Key Skills: Data Science, Data Analytics, Machine Learning, Data Analysis, Project Planning, Process Improvement, Requirement Gathering, Statistical Analysis, Predictive Modelling, Risk Analysis, Python, Hive, MongoDB, KSQL, Cassandra, Redis, Clickhouse	
Verified : Phone Number Email - id	

Last Active: 23-Jan-21

Last Modified: 23-Jan-21

Summary

- * A result-oriented professional with over 5 years of qualitative experience in Software development, Data Analysis, Devops and Machine Learning
- * Expertise in leading end-to-end project planning & implementation including scope management, activity sequencing, cost estimation, risk analysis & mitigation, impact analysis and quality management
- * Mined & analysed data from multiple sources to drive optimization & improvement and delivered data-driven solutions to business challenges
- * Excellence in continuously evolving technology, communicating data findings to both technology leaders and business managers to help the organization meet business challenges
- * Hands-on experience in Python, Pyspark, Flask, Hive, Machine Learning, Redash, SQL, Postgres, Clickhouse, Redis, MongoDB, KSQL, Cassandra, Nginx, GIT, AWS, Google Cloud

Work Experience

Digitaleast Gmbh as Data Engineer

Jan 2016 to Till Date

Growth Path:

Jan'16 - Sep'18 as Software Engineer

Oct'18 - Oct'19 as Devops Engineer

Since Oct'19 as Data Engineer

Key Results Areas:

- * Supporting the development, sharing and enhancement of dashboard and reporting solutions
- * Identifying user needs and requirements for determining feasibility of design within time and cost constraints; consulting with customers/ clients and translating business needs to data requirements
- * Evaluating data sources needed and assisting in estimation; managing data cleansing and pre-processing pipeline in python
- * Developing business solutions by using the available data and applying statistical & learning methods
- * Utilising predictive modelling to increase & optimize customer experiences and revenue generation
- * Analysing the user needs and requirements for determining feasibility of design within time and cost constraints
- * Implementing project plans within preset budgets and deadlines; monitoring and reporting on project progress
- * Driving the analytical scope and method for projects, including formulating and shaping the models
- * Processing complex data sets using advanced queries, visualization and analytics tools
- * Exploring applications of Data Science for operational excellence and using Machine Learning to derive key insights
- * Establishing scalable, efficient, automated processes for large scale data analyses, model development, model validation and model implementation
- * Designing and implementing statistical/ predictive models and cutting edge algorithms, utilising diverse sources of data to predict demand and risk
