Summary

Energetic and result oriented professional with having 4 years of experience in Accenture as Software Engineer. Dedicated team player with ability to adjust in new environments and circumstances through self-motivation and hard work. Conceptual understanding on the coding languages and the functionality of the project. Pursuing a position in the IT industry that enables me to utilize and build upon my technical knowledge to serve the organization in the best possible way with sheer determination and commitment.

Work Experience

Accenture as Software Engineer Nov 2016 to Till Date

MySolutionPlanner Jan 2017- Aug 2020 * Scope of the Project: It's a tool used by the Leadership of Accenture to estimate the projects that are received from the customer (project based companies) and calculate the amount of time and work needed to be put give a rough estimate of the project. It will give an accurate estimate for the amount of time it will take to complete the project, no of employees need to be involved for the same, how much effort and time to be given by the employee for this project, how much pay to be given to the working employee based on their career level . It also tells the customer how to complete the given project in short time and save time, money and employees efforts.

* Responsibilities:

- o Mysolutionplanner is an online platform which was developed from MVC and currently now to Angular 8
- o Worked in the screen developments from MVC to Angular 8 in Visual Studio(2019)
- o Was part of Operations team in for A year and half where as part of the team should be knowing the entire functionality of the project and connect with users in case of any production issues are raised and solve the defects within 4 hrs based on the priority of the defects
- o Worked as part of development team where I was in charge of creating 2 new screens and revamping of 2 existing screens from MVC to Angular-js and currently moving the entire platform of MySp to Angular 8.
- o So over 3 years we were developing the screens which was upgraded from MVC to Currently now Angular 8
- o As part of creating the new screens, the data base part of storing the dates for the screens and its respective tables and store procedures all have to be developed as part of the individual developer, therefore I have hands on in SQL server Data-base in creating the SP's and tables for storing or transferring data from one screen to another.

- o I was also involved in DB portioning where since lakhs of data's and Opportunities come store in the tables, we were told to divide the exciting tables and systems in order for the existing screens to work faster and with better output in an instant. A member of 3 people from the entire project team was selected for this process and I was one among the 3
- o Our project was fully working on agile methodology for over 4 years by delivering the business requirements in every months end, Recently its improved as delivering over 2 outcomes in the single month meaning working on 2 sprints parallel and deliver the outputs one after the other in a week's span
- o As a Tester (within the team)- As a developer I was involved in unit testing the current developed or developing screen and identify the issues and defects before it goes on official testing process by the testing team
- o As a Business Analyst (within the team)- Every Sprint all the developed screens and work done including development and testing will be documented by myself as part of Business Analyst and will distribute it across the business and leadership related to this project
