Summary

Overall 2+ Years of experience in software design, development, implementation, and Unit testing using Python and Django Technologies.

Expertise in full life cycle of Python Application Developments, Including Analysis, Requirements Gathering, Design, Development, Implementation, Maintenance and Enhancements.

Experience in implementing complete Software Development Life Cycle - SDLC for various applications including Analysis, Design, Development, Implementation Testing, Maintenance and Support.

Good working experience with Core Python, Django, Web Services with DRF(Django rest framework), MVC, JSON, Pytest, logging, SQLAlchemy(ORM), Flask, HTML, Design Patterns

Expertise in OOP's Object Oriented Programming like Python

Good experience in open source frameworks like Django and Flask.

Strong experience using Web Services and API's in python.

Used GITHUB to deployment of code

Hands on experience with MySQL Database development experience.

Work Experience

StanceCode Technology.Pvt.Ltd as Software Engineer
Sep 2018 to Till Date

Project 1:

Project Title : Automated Telecom BSS

Description

Telecommunication billing system is the group of services of telecommunications service provider that are responsible to collect consumption data, calculate charging and billing information, produce bills, process the payments and manage debts. Automation based billing system is used to check the usage of customers periodically. System helps subscribers with an efficient and reliable mode of payment for their telecom associated bills. The particular system helps subscribers with the option of electronic bills (E-bills) which allows subscribers to view their bills on digital devices such as smartphones, tablets or computers. System helps detect unique

Roles and Responsibilities :

Involvement in various aspects of the software development lifecycle including requirements capture, design, implementation with discussion with BA.

Understand the flow and confirm same with client in meeting.

Implemented module collectively with team.

Worked with senior engineers to get review on work done before start of the coding.

Developed Django ORM to make data interaction.

Created and passed REST API for Android App(JSON)

Coding of different modules as per the business requirements and preparing technical specifications documents for those functionalities.

Actively participated in standup project status meetings, sprint meetings or client calls.

Actively involved in Scrum Meeting to discuss the issue.

Involved in fixing application to ensure timely delivery along with writing unit test cases

Important
