## Work Experience

**Renault Nissan Technology & Business Centre India Pvt. Ltd** as Assistant Manager - Project Management  
Sep 2008 to Till Date

Growth Path:

Sr. Engineer 2008-2013

Assistant Manager 2013-2020

Project Executed

Project 1: Project Guarantee and Contract Service (PGCS) & Distribution System

Client: Renault (In-House)

Role: Team Member

Team Size: 20

Period: Feb'13-Apr'18/ May'19-Present

Description:

Renault is a French multinational automobile manufacturer. Dealers and People working in the Warranty Platform are the users of PGCS System. Customer of Renault brings his vehicle to Dealer for reparation. Dealer decides whether to do reparation or not Dealer through the DMS or GCM1 applications sends the invoice to Renault. The Invoices received by Renault and processed daily in a night batch. If the Invoice is validated, it goes to further processing of payment else goes back to Dealer for correction. All the validated claims are processed for payment monthly and the information is sent to external systems for doing payment to Dealer. Contract details are set in CTA, country, language, dealer setup is done in RFR, special technical support for Recall operations done by OTS and GRM

Verified Kafka in Ambari, NiFi Node verification for 5 Node cluster, 2 Nodes Cluster & Single Node cluster

Corroborated ingestions process source to transit flags status check for database

Project 3: RPL Migration to COBOL (Testing)

Client: Renault (In-House)

Role: Team Member

Team Size: 23

Period: Sep'08-Jan'13

Description:

Renault uses the RPL (Renault programming language) is an 'in-house' development language to support all the Renault business applications. The main objective of the project is to convert RPL language components to COBOL language components. The scope of this project is huge, converting 33 million lines of code over a period of 5 years. The approach for conversion is based on ISO functionality, which includes a bug in RPL, will still be a bug in COBOL. Developed a translator engine that will read line byline of RPL code and convert into COBOL

Key Result Areas:

Migrated code using the third-party tool

Debugged the issues to meet the actual requirements and validated the issues
