5. Involved in setting up the initial environment for the project.
6. Developing the code and performing the unit testing in order assure end to end defect free solution.
7. Analyzing the defects and perform root cause analysis and providing solutions.
8. Presenting ideas for system improvements, including cost proposals.
9. Maintaining the system once they are up and running.

IBM India Pvt. Limited as Application Developer Dec 2014 to Aug 2019

The GCP is the target information Service Platform & is the Logical Database that is clean, consistent and up to date with minimal Redundancy. The Purpose of GCP is to provide a consolidated architecture and environment for all enterprise software that provides development, test, and production framework for developing target architecture platform.

1. Developing the backend coding for SOAP Webservices.
2. Involved in requirement baseline process, HLD Reviews, Application Design with Business Analyst.
3. Involved in code reviews, coding and UT/IT.
4. Analyzing the business Change Request and to prepare good application design and to fulfill the customer requirement.
5. Involved in setting up the initial environment for the project.
6. Developing the code and performing the unit testing in order assure end to end defect free solution.
7. Analyzing the defects and perform root cause analysis and providing solutions.
8. Presenting ideas for system improvements, including cost proposals.
9. Maintaining the system once they are up and running.

SCPDB was responsible for Data Loading development for Idea Cellular Client.

It was catering to Prepaid Customers across 23 circles / states in India.

The Prepaid Data comprising of both Charged & Non-Charged Streams for every circle needed to be incorporated in the Idea.

Data warehouse and accordingly reports for the same were developed.

These reports are now being used by Idea Higher Level Management for effective decision making in order to include flexibility

in analyzing subscriber behavior and capability to enhance revenue through campaign management and cross-selling and upselling products.

1. Analyze & understand the Business Requirement and Specifications (BRS) provided by the client for generating reports using UNIX and PL/SQL engine.
2. Star schema-based design for Recharge related tables.
3. Testing scripts for some modification initiated from customer end and preparing the unit test cases to reflect the desired result.
4. Ensuring proper changes in the query as per requirement and if possible, providing a new logic design to meet the requirement.
5. Creating various user objects like procedures, functions, views, index etc. for ease of data retrieval and processing. Testing the created objects for their performance.

Education

UG: **B.Tech/B.E. (Electrical)** from **Visveswaraiah Technological University (VTU)** in **2014**

Other Qualifications/Certifications/Programs:

Oracle PL/SQL Developer Certified Associate

IBM Certified Application Developer - Cloud Platform V1

Oracle PL/SQL Developer Certified Professional

Projects

Project Title: EDF

Client: AT&T

Nature of Employment: Full Time

Project Location: Bengaluru

Role: Programmer

Duration: Apr 2016 - Nov 2020

Onsite / Offsite: Offsite

Team Size: 10

Skill Used: SQL, PLSQL, Jenkins, Unix, Weblogic Server,

Role Description: 1. Developing the backend coding for SOAP Webservices .

2. Involved in requirement baseline process, HLD Reviews, Application Design with Business Analyst.

3. Involved in code reviews, coding and UT/IT.

4. Analyzing the CRs and Implementation.

Project Details: The GCP is the target information Service Platform & is the Logical Database that is clean, consistent and up to date with minimal Redundancy. The Purpose of GCP is to provide a consolidated architecture and environment for all enterprise software that provides development, test, and production framework for developing target architecture platform.

Project Title: SCPDB

Client: Idea Cellular Limited

Nature of Employment: Full Time

Project Location: Pune

Role: Programmer

Duration: Feb 2015 - Mar 2016

Onsite / Offsite: Onsite

Team Size: 6

Skill Used: SQL, PLSQL, Unix Shell Scripting, Performance Testing,

Role Description: Write procedures, functions, triggers, packages to create reports.

Write shell scripts to generate reports and schedule them as per the requirements.

Project Details: Source Control Pointing Database

Affirmative Action

Category: OBC - non-creamy

Physically Challenged: No

Work Authorization

US Work Status: Need H1 Visa

Job Type: Permanent

Employment Status: Full time
