Work Experience

Wells Fargo as Senior Analyst

Feb 2017 to Till Date

Working on SQL, J2EE applications as L3 support analyst

Infosys Limited as System Engineer

Jun 2014 to Jan 2017

Project Name : IPM+ Infosys Internal Application

Role : L3 support and development

Duration : June 2015 - Till date

Description:

IPM+ is an internal application used by all employees of Infosys. It is a project management tool used to maintain the data of projects which includes project client details, resource allocation details, tools and language used in the project on regular basis.

Responsibilities:

Servicing L3 tickets

Database modifications

Minor enhancements on Java source code

Documentation of the application artifacts

Project Name : BNSF

Module Name : Web application Development

Role : System Engineer

Duration : Oct 2014 - Apr 2015

Description:

BNSF (Burlington Northern Sante Fe) railway corporation.

BNSF is the second largest freight railroad network in North America that provides high speed links between western and eastern states.

I have 3months project onboard experience. Have also worked on COC application (Code of Conduct) for BNSF employees.

Roles and Responsibilities:

Code changes, preparing requirements analysis, impact analysis and unit test plan documents.

Testing for issues due to code changes .

JavaScript and DB changes: Worked on a new requirement which required changes to be made in the web application by obtaining data from the database by using MVC architecture.

Adequate knowledge on JSP, servlets.

Adequate knowledge on Oracle stored procedure.

Good knowledge on manual testing.
