Title: ABC Financial Services

Period: June 18 - till date

Team Size: 60

ABC Financial is USA's leading software and payment processing provider for health and fitness clubs. In a process to upgrade to Platform based services; a new system is being designed. The solution includes high transaction security, a better CRM and better employee management system. This requires incorporation of data analysis tools like DOMO and automation of payment processing systems along with software integrations: Vantiv, Billing 3.0, Dimebox and Avalara. Being a payment processing provider, ABC Financials is also targeting to outsource its billing module in different geographies (mainly Europe); this requires building of an API portal too.

Role:

- * Created BRD and SRS for the project.
- * Created User Stories and User scenarios for the project.
- * Maintained product and sprint backlog.
- * Driven backlog grooming sessions.
- * Created process models/Realtime Boards utilizing BPM models on Axure.
- * Done product demos, facilitated sprint review and retrospective meetings.
- * Done both Software requirement verification and validation.
