## Summary

Result-oriented Professional with 1.3 years of experience in Artificial Intelligence, Software Engineering, Database Management System, Computer Networking, Data Structures, Software Development, Object Oriented Programming, Python, C, Java, C++, Algorithms, NetBeans, MySQL

## Work Experience

### **Samsung Research Institute** as Software Engineer Jun 2019 to Till Date

- Part of the Camera Team which works towards development, maintenance and enhancement of the camera application.
- I have worked on projects like dynamic rotation of camera application which involves change of reference point at the time of launch.
  - Worked on a Hand Sign language recognition project. In this project, the aim was to detect the signs of sign language. Used Mask RCNN for image segmentation and CNN for further classification.
  - Automated Delta tool : In the bringup, that is when OS upgrade is done there are some files in which the data is updated. Developed a tool that will take input as a model name and automatically update the data based on the previous OS files.
  - Used python as a programming language.
  - As a part of the Memory optimisation project, removed the pre-installed stickers from the device and made them available on Galaxy Store. Upon entering the sticker mode, the user is redirected to Galaxy store where he/she can download the stickers.
