Work Experience

Atos as Associate Consultant -IT
Dec 2018 to Till Date

Atos Syntel as Associate Consultant -IT
Dec 2017 to Dec 2018

Project: Atos BNCS NexGen

Type: Media

Client: BBC

Language: JavaScript, React JS, Java.

Project Description

The Atos Broadcast Network Control System (BNCS) provides a Custom operator panels, Macro functions, Common interface which is helping users to interact with media devices easily. It fully controls hybrid media infrastructures with powerful management and orchestration of physical and virtual resources and workflows.

Roles and Responsibility:

- * Working as a UI Developer for internal application.
- * Where I created a single (common) interface control panels using JavaScript, jQuery and HTML5 which meets our own style, language and brand. Designed it with CSS3.
- * Created a Login Form for the broadcasters using React JS Framework to control and monitoring philosophy from high level right down to operational needs and requirements.
- * Where I created a touch screen control Panels for all broadcast equipment, integration of all essential control and

- monitoring needs into a simple, flexible and workflow-based interface.
- * Where I have written a Clean Codes for DGLux5 tool using JavaScript Library.
 - * Alarms and monitoring modules for event logging and simple to use remote control of broadcast systems.
 - * It uses Java, Node JS, IoT, C++, React Js, JavaScript.
