Summary

Professional experience across multiple organizations from a variety of industries has given me a perspective to understand the Enterprise Structure, Business processes and Business strategy for IT. So far I have worked in Presales, Business development, Business analysis and Project Management activities. Learning business processes and designing strategic applications as per organizational requirements has been a job that interests me the most. I have acted as an active participant as well as facilitator in planning, analyzing, testing and demonstrating activities. Having worked in service and product based companies, I have obtained required skill sets from waterfall as well as Agile methodology. I have assisted in company process improvement activities by adapting various techniques stated by BABOK (Business analysis body of knowledge V2.0 & 3.0 and Agile Extension to BABOK).
