## Summary

An enthusiastic IT professional with over 6 years of overall experience in IT Industry, with and Java Knowledge. I am interested to explore further career opportunities which will best utilize my skills and provides opportunity to learn new skills. Started my career in GDCL as Computer Engineer in August 2012, after that I was Associate Consultant in Capgemini and recently working with Admaxim India Pvt. Ltd.

## Work Experience

### Admaxim India Pvt. Ltd. as Software Developer

Jun 2017 to Till Date

- \* Need to make the controller for each publisher which is the entry point for their request traffic for certain ads.
- \* Ads going to search in the system through Lucene.
- \* Response is sent through Json format using velocity tool.
- \* We will track all the response through Rest web services.
- \* Certain side projects are needed such as site VTR and user segment processing(targeting the ads) are done through batch processing using quartz. All the jobs are scheduled by spring quartz.
- \* Scheduling jobs include segment creation which includes device id segment which will help to target the audience for the particular ads also require multithreading to process all the segments.
- \* There is also yahoo weather prediction which will require xml parsing and weather data also require to target particular location.
- \* Spark with java uses aws emr system to provide cluster for spark , spark is used to clean the third party user demographic and store in mongoDB.
- \* MongoDB has been used as a backend database for most of the system.

### Capgemini as Associate Consultant

Jan 2014 to Jan 2017

- \* Daily analysis done with simple thing that which document has failed to process automatically. Simple concept is that priority of document change when it failed. Need to find the priority and analyze that document why it has been failed.
- \* Made one tool which checks scan document which failed and it's in IBM MQ failed status queue and that tool correct some scan document status logs which is responsible for processing the document.

- \* Made one monitoring tool which checks each and every server application status and service status and also checks document priority status. Restart the application whenever it is necessary.
- \* Cash Receipt is one more module in insurance project where you have to look at the transaction batch has been processed or not.
- \* Cash Receipt transaction batch also depend on document which has been provided for insurance proof so if document failed then transaction failed and we have to manage all this through several Sql commands.
