I have been part of three projects in current origination,  
Project 1:  
Company Cybage Software Pvt. Ltd.  
Client US Auto Parts  
Role Developer  
Duration June 2018 To Present  
Database

## Techniques

### SQL Server 2012

Project Description: U.S. Auto Parts is leading online provider of automotive parts including collision, engine and performance parts and accessories. WMS was implemented for 4 sites (Lassalle, Virginia, Nevada, Peru) and WIP for 2 more sites (Texas, PA). This project is using Agile and SCRUM methodology for the Project management using JIRA as tool. For versioning of code, we are using SVN and moving on to the GIT.

Roles and Responsibilities in the project:

- ? Python 3.8 with Flask framework is used to develop REST APIs which is consumed by other Modules in the project to perform operation.

- ? Implementation of integrations, for Purchase Orders, Sales Orders and Inventory?s in the Database from the XML.

- ? Development is done using Object-Oriented concepts

- ? End to end implementation of two WH sites in HJ, setup of database servers for the same.

- ? Implemented Cron Jobs, including the SSIS Packages with saving them as CSV files on FTP folders.

- ? Used Replication methodology and Linked servers for the communication between more than 5 databases for different perspectives.

- ? For the Tracking Number Generation, implemented the code in database for .net team support.

- ? Used SSRS, Bartender for Label Printing, Case Label Generation.

- ? Query optimization for long time taking objects.

- ? Direct communication with clients for the Product and WH requirements.

- ? Development of end to end requirements for warehouse operations.

- ? Implemented the Order Fulfilment of Big Giants like Walmart, AMAZON, eBay, including US Autoparts own website.

- ? Working closely with the Data Science team to reduce the cost of shipping and enhance the Employee Performance to reduce the time.

- ? Understand and analyse the new requirements with Design and Business Priorities.

- ? Preparing test metrics, review of test cases.

- ? Conducting Demo, Deployment strategies and smoke testing.

Project 2:

Company Cybage Software Pvt. Ltd.

Client Expolanka Srilanka

Role Developer

Duration January ? June2018

Database

Techniques

Oracle

Project Description: Expolanka is to implement HighJump WMS in two of their sites and automate / optimize the current warehouse operations and related activities like inventory management and reports. Development was done to meet Expolanka within the constraints of the HighJump Warehouse system capabilities.

Roles and Responsibilities in the project:

- ? Development of Change requests (CR?s).

- ? Preparing test metrics, review of existing test cases.

- ? Query optimization for long time taking objects.

- ? Development and fixing of the issues

- ? Conduct the Pre-GO LIVE activities like FAR and UAT.

- ? GO-live support and status check of the releases made to production

## Education

UG: **B.Tech/B.E. (Computers)** from **Rajiv Gandhi Proudhyogiki Vishwavidyalaya (RGPV), Bhopal** in **2016**

PG: **PG Diploma (Computers)** from **Center Of Advanced Computing CDAC ACTS PUNE** in **2017**
