Last Modified: Jan-Mar 2021

Summary

Strategic Software Development Professional with experience of over 6 years in providing insightful knowledge of business process analysis (As-Is, To-Be) and design, managing application-based process re-engineering, process optimization, cost control & revenue maximization from technical solutions using cutting-edge technologies like Apache Spark, Apache Kafka, Apache Hbase, Apache Ignite and so on

Understanding of Software Development Lifecycle (SDLC) right from requirement analysis, documentation (functional specifications, technical design), coding and testing (preparation of test cases along with implementation) to maintenance of proposed applications

Successfully provided solutions to different processing loads like Synchronous, Asynchronous Processing, Stream Processing, Batch Processing and so on to internal business groups

Completed the migration of existing storage successfully from Mysql to HBase and developed Generic HBase APIs for requirements

Work Experience

Network Components Pvt. Ltd as Team Lead

Feb 2018 to Till Date

Managing a team of 8 members and participating in complex projects or multiple components of a large project using Agile Methodologies involving more than one company's product; following the project life cycle methodology defined under the process framework; ensuring that customer deadlines were met within project budgets

Allocating estimates, project plan, project schedule, resource allocation and expenses to ensure that targets were reached
Acting as an Architect & Technical Lead; developing software solutions by studying information needs, conferring with users, studying systems flow, data usage, and work processes; liaising with users for requirement gathering; prepared functional specifications and low-level design documents

Integrating Apache Kafka and Apache Spark; tuning system configurations by analyzing CPU utilization, Memory utilization, throughput and so on of system components by executing different type of load tests & stress tests

Acting as a lead of architecture review board (ARB) for business; organizing architecture review board meetings to get constructive feedbacks from senior developers on current architecture

Tracking status against UAT, Go-Live Plan and delivering WSR reports with quality metrics, defect types analysis; prioritizing the backlogs with stakeholders from different and same countries

Managing the maintenance of program modules including operational support, problem resolution, production support, preventative & corrective maintenance and enhancements

Testing modules developed by self & the team to ensure that these were as per desired quality standards; writing test specifications and conducted tests
Reporting overall status of the project to the client and senior management; managing delivery of the application to customers
