Projects

Project Title: **Android Based Travel Management System**
Client: **JNTUK-UCEV**
Nature of Employment: **Full Time**

Duration: **Nov 2016 - May 2017**
Onsite / Offsite: **Offsite**

Project Details: We present a novel approach that strategically modifies a few transactions in the transaction database to decrease the supports or confidences of sensitive rules without producing the side effects. Since the correlation among rules can make it impossible to achieve this goal, in this paper we propose heuristic methods for increasing the number of hidden sensitive rules and reducing the number of modified entries.

Important

- Using Free CV Search you have access to featured candidate profiles of Naukri. You can browse through the profiles and email the candidates of your choice directly using the email option provided. To prevent misuse of candidate information, contact details and attached resume of the candidates have been withheld.
