Work Experience

Tata Consultancy Services as Application Developer

Nov 2016 to Till Date

System Engineer Nov 2018 - Present

Inventory and Production Module: Inventory management is primarily about specifying the size and placement of stocked goods. Production is a process of making or manufacturing finished products from components.

Responsibilities:

- * Worked as Application Developer in one of the TCS product - "Manufacturing Solution", which is a Tax Cloud based ERP system.

- * Assignment of Work and mentoring the team and ensuring Quality, on time and defect free delivery.

- * Interfaced with cross-functional team of business analysts, developers and technical support professionals to determine comprehensive list of requirement specifications for application.

- * Helped in signing the customers by delivering features requested by potential customers in very less span.

Assistant System Engineer Nov 2017 - Nov 2018

ODR (On Demand Reports) and DDR (Drill down Report): Have develop reports for different module and entities. On Demand Reports (ODRs) enable you to generate reports depending on the organization requirement. Drill-down reports help you to view the detailed transactions and corresponding production operations in the same screen without navigating to the respective module screens.

Responsibilities:

- * Design and developed new report based on ETL (Extract transform and load) and MTS for different entities.

- * Upgrade 40% existing report for new Major WildFly release.

- * Updated existing database tables for performance issue like primary key should not be by default zero, adding index etc. with up gradation of MySQL server.

Assistant System Engineer Trainee Nov 2016 - Nov 2017

Production Team: The major work is plan a production movement of Code and query through Major, Minor, Hotfix pipeline.

Responsibilities:

- * Code deployment through Jenkins. Quick support for Sonar issue.
- * Code movement to Production and sanity in night time to avoid any kind of server degradation issues in production.
- * Script execution on testing environment such Devhf and QAHF and then production movement and trouble shooting.
