Summary

With 10+ years of IT experience in Accenture, I have been through multiple roles and responsibilities. Roles performed - Solution architect/technical architect, Project management, Product Manager, Automation/Innovation lead, Team Management, Application lead, Support team Lead, reporting and direct communication with Managing Director, Project acquirement, Project transition, compensation and budget management etc. I have a very strong technical and functional understanding of the IT business operations in retail sector with an expertise in Oracle supported tools and applications. I had a good exposure while working closely with client at onshore (London, UK) for 2 years in 2015-16. I have a good experience in Oracle application implementation, requirement gathering, data mapping/migration, risk analysis, testing Cycle, integration/interface development, batch scheduling, building estimates/SOW and team management. I have worked as a Product manager to launch Pricing application.

Work Experience

Accenture Services Pvt Ltd as Associate Manager -IT
Jul 2010 to Till Date

I had started my career with Accenture as an Associate Software Engineer in July 2010 wherein I was trained in PL/SQL and shell scripting in UNIX/LINUX. Since then, I have been working with multiple clients and have gained experience in Retail sector & Oracle Retail applications/ tools.

Sep 2019 - Aug 2020 - PM Project - Analyzed the business process around item pricing and customer response at store. Took the feedback from Business users on day to day challenges around pricing strategy. Based on this, designed a product (PM - Price validation and Injector) to apply Promotion, Markdown and price change to Items with simple UI and more efficient performance. Managed the release as product and project manager. This was entirely my Idea and delivered to the set expectations.

Jan 2020 - Aug 2020 - Differential Pricing - As a solution architect, designed the solution to apply different pricing strategy for Web Stores and Retail stores (B&M). This included new zone creations and changes to in house applications. The project was successfully delivered on time.

Feb 2018 - Jan 2019 - Cloud migration for Infra and data center movement- As a project manager, I was involved with very challenging task to migrate the Dev environments from IBM cloud to on premise. At the same time, other task was to migrate only particular infrastructure to cloud in AWS. This activity was successfully delivered on time.

Aug 2018 - Sep 2019 - Integration Between RMS and 3rd Party tool for Purchase order - As a project manager I was assigned the task to integrate the data flow between Oracle RMS and 3rd Party tool PLM. Data Stage tool and FMM tool was used to solution the work requirements. The task was delivered on time with requirement gatherings, format agreement and performance efficiency.

Sep 2014 - Sep 2016 - ATLAS upgrade - As part of ATLAS upgrade project, I was in the team for RMS v14 implementation, followed by transitioning the service from Dev team to Support team.

Jan 2012 - Dec 2012 - FAE View Project - I worked as a developer in this project to create 9 interfaces between Oracle Retail products (RMS, ReSA, RPM) and Stock allocation inhouse tool. Key skill was around, UNIX, Shell scripting, PL/SQL programming, FTP, XML structure etc.

Other projects in which I have worked - Allocation Builder for stock replenishment, Quantum science, Operational data Storage. Along with this, I manage support team implemented, SPLUNK, Watson BOT, RPA in my engagement.
