Summary

Strategic Technology Executive, offering chronicled success of nearly 15 years in SDLC, DevOps, Cloud, Source Code Management (SCM), Continuous Integration (CI), Continuous Delivery & Deployment; successfully implemented continuous delivery process in a Microservices based Architecture
Interacted with the clients business and IT teams to gather, define, clarify & refine requirements and guided the architecture & design of applications; aligned architecture to business strategy in order to deliver structured, efficient, sustainable & adaptable DevOps, Cloud solutions in line with the business need
Expertise in working as an Individual Contributor; showcased proficiency in delivering large-scale, complex programs with a focus on technology transformation for various customers; heading the implementation of CI / CD pipeline for micro-services.

Work Experience

PublicisSapient as Senior Manager -DevOps
Dec 2011 to Till Date

Key Result Areas:

Providing DevOps Consulting Services to accept DevOps or transform to DevOps culture aligning with Agile & Cloud best practices; mentoring teams to establish DevOps culture, setting up efficient and robust CI/CD pipelines
Developing and building, deploying, automating and configuring IT solutions using DevOps platform; implementing reusable components and translating technical requirements
Creating DevOps architecture aligned with app and infra architecture; breaking down complex architectures for teams to deliver in set pieces
Building automated deployments through the use of configuration management technology; deploying new modules & upgrades and completing fixes within the production environment
Developing frameworks that leverage productivity amplifiers such as reusable assets and solution accelerators for scalable deployments and operational excellence
Evaluating existing applications & platforms and providing recommendations for enhancing performance via gap analysis, identifying the most practical alternative solutions and assisting with modifications; creating POCs to substantiate solutions proposed
Nurturing, executing and implementing transformative technology catalysts such as versioned programmatic infrastructure, configuration management, CI/CD and continuous feedback/monitoring systems through consultative internal engagements
Estimating delivery cost, statement/scope of work, phase wise break-down for proposed delivery points and metrics to measure success
Steering diverse responsibilities, including strategy planning & execution, new initiatives & operations across various stints with the group; delivering exceptional client service throughout complex, mission-critical solutions
Stabilizing programs through diligent leadership and rigorous improvements, succession planning to de-risk programs, driving client engagements to baseline expectations and SLAs
Assisting in distributed system reliability and scalability and functioning as a change agent for DevOps and SRE methodologies; imparting guidance to the team for architecting solutions for problems, focusing on achieving project
