Work Experience

DeskNine Pvt. Ltd. as Associate Software Engineer -MEAN Stack
Apr 2018 to Till Date

Worked on ' SignDesk ' - A Digital Stamping Product which is a Contract Workflow Automation solution that includes Digital Stamping, eSign workflow, and the eMandate solutions.

Worked in the core product team and customization team where different requirements were incorporated in the application and delivered quickly on time.

Researched on AI and ML to implement smart features into the existing product.

Worked on ' Melento ', a Quote to Cash platform from scratch and helped in launching the beta version successfully.

Software Engineer: [MEAN Stack] (Jan 2020 - July 2020)

Handled the development of the product ensuring the quality with good user experience.

Engaged in regular build checks and code deployments (AWS).

Led a team of developers and co-ordinated and collaborated with QA, Product, Content, Design, Legal and Sales teams to ensure smooth delivery of the product.

Interacted with clients along with the sales team to get feedback to make the application more user friendly with enhanced features.

Handled task management with tools like JIRA and Google Sheets.

Engaged in training the freshers regarding the product, coding standards and application standards.

Worked towards development of the live version of 'Melento'.

Software Engineer: [AI/ML Development] (Aug 2020 - Present)
Melento V2 is an AI driven collaboration tool that provides an all-in-one solution to automate the employee-employer-clientele journey covering all the major functions to help all the organizations become more productive.
Worked in the AI team to build smart features of the product that help in better functioning of the application and make the user experience seamless.

Roles and responsibility include
Writing microservices containing NLP features and exposing them over RESTful API
Data gathering, merging and pre-processing (cleaning) of the gathered data, performing Exploratory Data Analysis (EDA)
Running the preprocessed data through various machine learning models to gain more insights out of the data.
Text analysis using TF-IDF, Cosine Similarity, BERT model
Performing A/B testing and comparing results to ensure an optimized algorithm is implemented.
