Summary

Business Analyst analyzing business operations and supporting business software solution. Aiming to utilize my strong prioritization skills and analytical ability to achieve the goals of the esteemed organization. High proficiency of Software Development Life Cycle (SDLC) for multiple applications using Agile Scrum methodologies.

Work Experience

 **HDFC Bank** as Functional Analyst-IT
Jun 2019 to Till Date

Worked through the entire process of Software Development Life Cycle which includes requirement gathering and analysis, system design, development, testing, implementation and production support.

Collaborated with Project Manager, Business/Operations/Stakeholders, subject-matter Experts, Developers and Testers.

Preparation of 'Requirement Document' by interacting with business/operations/stakeholders based on the provided concept note, requirement analysis of whether the requirement is technically and functionally feasible, provide understanding of the Requirement Document to developers, perform UAT when the requirement is developed, go live with the enhancement, production support for a few weeks until the users are familiar with the flow.

Performed several enhancements on applications like FTS (Form Tracking System), KYC (Know Your Customer), RIS (Record Inventory System). These applications are used by the internal HDFC bank staff to process account opening forms and customer instructions. These applications handle the entire lifecycle of an account opening process in HDFC Bank. These applications have interfaces with vendor based application Data is flown using APIs and Webservices
