Result oriented professional with experience in Software Engineering, Software Development, Front End Development, Application Support, Project Management, Change Management, Defect Management, Quality Management, Requirement Gathering, JavaScript, React.Js, Node.Js, Django, HTML, CSS

Work Experience

Wizemarkets Analytics Private Limited as Front End Developer

Jul 2018 to Till Date

SPA DASHBOARD

SPA client dashboard that is responsible to show client portfolio and asset value on a daily basis.

Responsible for porting the old application into a new one with the use React Hooks

Developed and integrated the frontend interface and implemented to backend to accept payments periodically by implementing nach (National Automated Clearing House) debits.

Developed user interface to raise ticket and integrated the same with apis.

ONBOARDING SPA

Responsible for building Admin Interface to onboard new clients using REACT JS.

Implemented user deal lifecycle management involving third party api integration for deal management using firebase functions and node js. This is helpful for the sales team to track a user in the deal management system.

Implementation of REST API to onboard a new client using node js and express js.

MARKETING WEBSITE

Implemented design to build capitalmindwealth.com

Technologies used GATSBY, Firebase Hosting.

AUTOMATION OF PLAN GENERATION

Automated plan generation of a client who opts to get started on the website so that the sales and marketing team can focus on more important tasks in hand. This involved creating of a personalised pdf for the client show the summary of their plan.

PROGRESS BACKEND

Implemented rest api to create a ticket raised by the client on a particular topic. Technologies used django rest framework and python.

Wrote a service that will reconcile or check for any differences present between the backend database and in the demat account of the client to ensure the sanity of the state of the system. This may arise due to delayed settlement of the holdings (stocks or mutual funds) from the date the company buys or sells for the client. Technologies used Python and Django.
