Work Experience

Perscitus Solutions Pvt Ltd, as Software Engineer -SDLC

Apr 2017 to Till Date

Software Engineer seeking roles in Software Development, Application Programming, Application Maintenance, Project Management, Requirement Analysis, C, C++, JavaScript, JQuery, HTML5, Angular JS, Angular 4, React JS, Meteor, CSS, AJAX, JSON, NodeJS, AWS, Twilio

Perscitus Solutions Pvt Ltd, as Software Engineer -SDLC

Feb 2017 to Apr 2017

Project Profile

Project 1 from Feb 2020 - till date

Project Name : Caryn HealthShare System

Client : Universal Health Share [<https://www.universalhealthfellowship.org/>]

Technologies : React JS, JavaScript, JQuery, Type Script, Material UI, CSS, Bootstrap, etc

Project Summary :

Caryn Health share is a system which provide sharing insurance for people. There are several part of these system like Enrollment, Agent, Member, Admin, CSR (Customer Support Syatem) Portal.

Basically, Admin created the agent on the basis of for which company they want to enroll people in to insurance. Then Agent contact to peoples using some contact information and If the agree to take the insurance then they are registered on Enrollment portal by agent or themselves with some basic parameters. In enrollment, system generates the basic quote for them using some basic information. Then they go through some eligibility criteria on that basis if some family member are not eligible to enroll to this insurance or for some family members it will cost some additional charge. Once they verified data with Third party integration layer system, they are ready to use that insurance. Once they verified with system they got the access of Member portal with their Member Id card and Health Card details. From member portal they can download different type of health card and they will able to see their all status for their needs and remaining insurance amount. With the health of CSR portal, they can solve user's queries. CSR people help people to handle there all queries and also change their payments accounts as well.

ROLES & RESPONSIBILITIES:
Creating React JS module with responsive CSS as per design comprehensive.
Creating responsive component for multiple resolution.
Integrating data with the help of React JS services.
Performing unit testing for good quality of code.

Project 2 from Mar' 2018 - To June' 2019
Project Name : Alignor
Client : AlignorSkills [https://www.alignorskills.com/2020/]
Technologies : Angular 4, Node JS, javaScript, MongoDB, Html5, CSS etc.
Project Summary : Alignor helps its clients achieve their business objectives through a wide array of products and services, including scenario-based computer simulations, customized training, expert coaching and consulting, evaluation tools, blended learning and e-learning, and customized job aids and tools. There are two type of role defined into this system that is: Super Admin and Lerner. Super admin are responsible for create group of user and adding them to a particular set of games and managing them. Super admin also create the game on the basis of scenarios like [Scenario 1: If you have team of 4 people, you are the leader of team. Deadline is coming soon for your project and team is not responding and so many things are not have done yet.] In this situation either you have to 2 ways to handle them, one is in positive manner and other one is aggressive. For your better practice game will provide u both option, you have to choose the right choice to go forward into the positive manner. This way people learn to tackle there industrial issues and system will help them to redirect there problem in positive manner. Also system will provide them score on the basis of the performance.
