other metrics, monitoring and alerts on application failures, moved HTTP based Asynchronous communication to Kafka based communication. Technologies used in this project are Spring, Kafka, Cassandra, SOLR, Hive, Hadoop, Spark and Java Script. Implemented Kafka based real time metrics aggregation for Analytics project where collected different metrics to measure the efficiency of underlying services. Used Cassandra persist events to track the lifecycle of item that gets setup on walmart.com . Used Cassandra for keeping state and records of items getting setup through Walmart's supplier center: https://supplier.walmart.com
