Summary

I Niraj Kumar have over 10 years of experience in Windows and Web application development using Microsoft .Net Platform. I have been involved in developing Windows and web based application, designing UI and writing business Logic. I was also involved in requirement collection and creating test description for the application. I have worked in database design. I have worked on different Windows and UNIX operating systems. I have done my Bachelor of Engineering in Electronics and Communication from V.N.E.C Bellary, Vishweshwaraiah Technological University. I am currently working for IGS for last 21 months. I have recently worked on Cloud based technology and also on new front end technologies like Angular and Knockout, Nodejs

Work Experience

Dell International Services as Principal Software Engineer
Jun 2017 to Till Date

Working as Architect for Data Science analytics an Chat Bot mostly using .NET framework. Bots have become a revolution in creating personalized content and textual conversations that are relatively easy to deploy at scale. Bots are really good at catering to each client/customer on a real time basis.

All sorts of services are being "botmized" (See what I did there?).
Using bots, we have the freedom to tackle interesting questions.

Synechron Technologies as Associate Specialist Technology
Aug 2015 to Jun 2017

IGS as Technical Lead
Jul 2013 to Aug 2015

Coding and Debugging, Unit test, Deploying

Neudesic Technology Private Limited as Senior Consultant
