Work Experience

Tata Consultancy Services as System Engineer

Feb 2017 to Till Date

Current Project: EldP - Enterprize Identity Provider, Access Management for Banking - Deutsche Bank

The purpose of the project is to provide access management with two factor authentication and multiple factor authentication for user and application.

My Role

- > Able to work with application teams (i.e., PaaS-Dap & Fabric, dWeb and OTP) assist in implementing and tuning services that are reliable, available and performing.
- > Solid organizational skills including attention to detail and multitasking skills.
- > Strong agent to drive change including the ability to facilitate new processes and standards by Change Management Process.
- > Strong sense of ownership and accountability of Banking clients and services.
- > Excellent troubleshooting skills and the ability to logically think through problem resolution.
- > Knowledge of associated technologies such as: Windows Server, Active Directory, Databases, OAuth- Saml & Openid, RedHat, Monitoring tools like kibana splunk scribe and etc.

Key Responsibility Areas:

- > Issue investigation for application and user related to access management and authentication
- > Providing authentication to users via QR code, Smart card, OTP.
- > Onboarding of application on EldP - Enterprise Identity Provider platform via Change Request
- > Daily and weekly reports to the application team via LogLogic, Scribe, Splunk etc.
- ? Mentoring and Training of new associate consultants

Project Completed: General Data Protection Regulation

GDPR is a regulatory programme implemented across all the banks in UK, as part of this project we have introduced a new business marketing preference screen which is used to determine the customer wants bank to contact them and all the marketing consent details captured in this screen will be stored in a centrally located system. All the marketing consent Information needs to be traversed via web service and put forth in a host system. SOAP web services were used to collect the information's from the user.

My Role

- ? Analyzed the business requirement by interaction over client through calls.
- ? Performed as a Team Lead from Offshore (single source from offshore) and managed to implement the project with responsibility.
- ? Developed an new screen and stored the data into an host system through an web service
- ? Product deployment, Testers ,Support and Maintenance
- ? Involved in bug fixing and peer reviews with the help of tech lead
