Summary

Dedicated Software Engineer, worked at Paytm, one of India's largest e-wallet companies. Helped maintain and develop the backend system of the Paytm POS application, which helped retail merchants onboard into a smart retailing experience.

Work Experience

Paytm as Software Engineer -Software Development
Jul 2019 to Jun 2020

Worked on the Paytm POS Application Backend written in Python's Flask Framework.
Simplified the fetching of tax classes of items during catalogue creation and during purchase order invoice generation by the merchants.
Revamped its SMS push notification service on the backend, to adjust to various use cases of the Mobile application.
Fixed production level bugs affecting the merchants at various periods of time.
Application helped retail merchants adapt to an organized inventory managed system.
Coordinated with different Paytm verticals to ensure continuous product functionality.
Briefly worked on the Paytm Recharges Data Warehousing Report Generation system.

PROJECTS

Robust Transport Management System
Built a web application for students and staff members of my college to register for Bus or Vehicle pass.
Buses allotted on the basis of the point of origin.
Parking slots allocated on the basis of the member's native department.
Respective passes were printed after completing the registrations.
