Report generation, revenue forecasting , resource management, customer engagement.

Invoice processing, Optimize resource Utilization.

Estimations Project planning and control.

### **ITC Infotech** as Project Manager

Mar 2019 to Dec 2019

Project: SAS-EGRC System

Client: NCB, Jeddah

The objective of this project is to implement an integrated, holistic solution to risk, and compliance, ensuring that an organization acts correct and in accordance with its risk appetite, internal policies and external regulations through the alignment of strategy, processes, technology, and people, thereby improving efficiency and effectiveness. The solution should support risk identification and assessment, control evaluation, loss management, issue remediation, Key risk indicators ?KRI? monitoring, and reporting.

Payments BaNCS 9 to BaNCS 14 Gaps migration:

The Company has implemented TCS BaNCS Payments solution as part of NextGen initiative. As part of this Project (R3A), NCB is upgrading Payments functionality including SARIE Payments, SWIFT Payments, Direct Debits, Retail and Corporate Electronic Payments (excluding Card Payments) along with the required user interface for the Branch and Back Office users of the system. Outward Payments from branches (SARIE & SWIFT) planned for Rollout as part of Drop I. Inward Payments from SWIFT and SARIE will be rolled out as part of drop II. Bulk Payments planned for rollout as part of drop III and channels pilot/rollout is in progress.

Idikhar Mobile Application:

Create a Mobile app with the ability to perform financial & non-financial transactions.

View only pages enabling the member to access information, for example, view balance and transaction history.

Update and remediate Omni Script drivers and PLSV files used by OWS to accommodate the Mobile app. Unit testing and testing support. The application will be available on Apple iOS & Android platforms. The application should support English and Arabic versions.

Roles and Responsibilities

### Important
