Adding the new features based on client requirement

Client: CERAS

Role: Lead developer

Project: CRM

Team: 3

Description: This CRM application is to help the users from creating contacts to convert them as account. So, user can create the contact and can convert to lead, opportunity, proposal and account. User can see their contacts on the google map also using this application to help the marketing team can prioritize the specific area for their business. Sales team

can analyze profit based on Physicians/Providers. Sales team can choose clients based on analyzing profit.

#### Project#2

Client: GE Digital  
Role: Lead developer  
Project: Digigo  
Team: 3

Description: The purpose of this application is to guide the care taker of a patient. Based on patient disease, gender and age guide lines will be fixed to cure the disease. Web application will be developed only admin purpose. To maintain the data and answer the questions of care taker through chat.

#### Entransys Pvt Ltd as Associate

Jun 2017 to Feb 2020

Project: Minerva  
Team: 5

Description: The purpose of this application is to Crawl the tenders from different websites and select relevant tenders based on matching keywords. Generate certain reports such as Ageing report, Expiry report, Win lose report, Bid rate and Win rate. Send notification to respective executives. Also notify when new tender is crawled. This helps sales executives to see all tenders in one place instead of visiting different websites for tenders.

#### Project#4

Client: GE Healthcare  
Role: Lead developer  
Project: FBTS  
Team: 5

Description: The purpose of this application is to automate Billing process, alert the relevant people in organization if a process not going as intended way and provide reports for analysis and correctness in future. Also sending the emails for approval and read approved emails data and update the status automatically. Track shipment of parts for each SR.

#### Project#5

Client: GE X-Ray  
Role: Developer  
Project: Vitality Dashboard (1.0, 2.0 & 3.0)  
Team: 4

Description: Vitality Dashboard is a Web Application to provide solution for managing a BOM (Bill of Materials) of a product. Before making the product, user needs know the raw material or parts information. Main feature of this application is to find BOM Risk, Cost saving and additional reports based on parts attributes (like life cycle stage, Age, Year to End of Life (YTEOL) etc). user can easily find out the risk before he starts manufacturing product.

I consider myself familiar with Information Technology Aspects. I am also confident of my ability to work in a team. I hereby declare that the information furnished above is true to the best of my knowledge.
