Summary

To work in globally competitive environment on challenging assignments that shall yield the twin benefits of the job satisfaction and a steady-pace professional growth.

Work Experience

ALSTOM Transport India Limited as ATS Application Engineer
Dec 2018 to Till Date

ATS Application Engineer and having an experience of 2 years. My role in ATS Subsystem is to design and prepare the ATS Inputs and then to integrate with the System level and CoreFramework inputs under CoreJS and SQL Environment to make the ATS Specific Databases which further will be deployed on site. In order to make the ATS Databases, the first step is to write/prepare the python code with specific rules (As per the Architecture) and then to do data preparation with the help of .xsl templates for each .xml files. Data Compilation is the last step to make the databases. The process from data preparation to data compilation is automated with the help of TCL Script. This script is handled by myself. The main responsibility is to deliver the ATS Software to the Site which is useful to supervise the train. Good hand on railway Signalling logics, C, Python, TCL, MySQL, networking and automation. Last year, I was on site (Singapore) for one month.
