Work Experience

Infosys as Senior System Engineer
Nov 2020 to Till Date

Project Name : CLEAR(Company Product)

Project Description : CLEAR is the media product used by many channels like Disney, HBO, CCTV for telecasting, live telecast like IPL, film-making to support the technical work and also the animations, titling and sub-titling especially in film making. In this Product there are many divisions where I worked in Admin Team which is the core module of the product. This helps the tenants to perform and keep track of all the activities.

Technology Used : C#, .NET 4.5, SQL Server 2016, Web API's, JavaScript, SVN, VS 2017.

Company : Prime Focus Technologies

Responsibilities

Analysing and understanding the enhancements required in existing product and new features to be included based on tenant/client's requirement.

Creation of new Folder level based on tenant requirements.

Handled the enhancements of log fields to make the log details more clear and understandable.

Involved in deployment of releases held on rotational basis.

Worked on WebApi as calls were made using API's.

Got to work with javascript functions and in a scenario to build the html components from backend c# code

Compassites Software Solutions as Associate Software Engineer
Oct 2018 to Mar 2020

Analyzing the business requirements.

. Creating business layer for data connection and writing codes for business logics.

. Creating Resource files for error messages used and implementing them during data validation.

. Worked on generation of notifications and mails based on the respective actions occur in the application.
