SharePoint and API Developer

In this project I developed SharePoint Search functionality using REST API.  
I configured SharePoint search based on the requirement and created managed properties and the result source for the query to be searched. Developed an API for the same using restful services.  
Used Azure cosmos dB and SQL server as database for user details.  
Course contents were stored in SharePoint.

Also developed PUSH Notifications and BELL Notifications for the website.  
Created API for sending PUSH notifications using google cognitive services. I used Google firebase for sending push notifications.  
Created APIs for showing bell notifications in user home page based on USER id.  
For bell notification data was stored in Azure SQL. Worked on triggers and Stored procedures. Also worked on LINQ to SQL

I worked on Microsoft Azure logic apps to develop different functionalities.

I worked on Microsoft PowerApps do develop different mobile apps based on requirements.
