## Summary

Talented Project/Developer Lead with strengths in client management and problem-solving, coupled with good understanding of software development life-cycle. Highly effective at managing multiple, concurrent projects. Willing to direct large-scale teams or work hands-on to complete extremely difficult projects..

## Work Experience

### **L&T Smart World & Communication** as Senior Engineer(Systems) Aug 2018 to Till Date

Involved in the end-end implementation and the integration of comprehensive Smart & Safe City solutions.  
Responsible for end-end Integration and Implementation of 40+ Proof-of-Concepts Sessions for evaluation prior to on-boarding new partners and solutions.  
Monitored and tested application performance to identify potential bottlenecks, develop solutions, and collaborate with developers on solution implementation.  
Responsible for developing Microservices for complementing different IoT solutions for better services to meet the changing client requirements.  
Developing and Testing Android Apps responsible for augmenting various Smart City Applications.  
Devised documentation for each Smart City Application, detailing operation aspects, functions, capabilities and features.  
Responsible for conducting and evaluating Performance and Load Testing for multiple Smart City Applications.  
Performed and reviewed technical security assessments of various Smart City Applications to identify points of vulnerability and non-compliance with established information security standards and recommend mitigation strategies.  
Responsible for implementing Elasticsearch (ELK) stack for providing a SIEM solution featuring centralized logging, system monitoring and security monitoring.  
Served as primary liaison between software customers and development team, relating feedback and concerns for future update cycles.
