Summary

An enthusiastic professional with over 5 years of rich experience in Software Application Development (Java EE using ADF) Provided insightful knowledge of business process analysis (As-Is, To-Be) and design; managed application based process re-engineering as well as process customization, process optimization and provided technical solutions from stability prospective

Expertise & hands on experience in Java, SQL, OOPS concepts and IKM certified; Implemented DevOps using Jenkins, Hudson which enhances continuous development and delivery in project

Skilled in Oracle ADF Web Application Development, WebLogic Administration as well as Webcenter Portal Developer

Identified, conceptualized and documented appropriate technical solution approaches for various business scenarios and challenges

Followed the project life cycle methodology (Agile) defined under the process framework; ensured that customer deadlines were met within project budgets

Work Experience

L&T Infotech as Senior Software Engineer

Jun 2015 to Till Date

Project Executed:

Project Name: ABSA-WIM Portal, Johannesburg, South Africa

Team Size: 19

Period: Nov15-Present

Tools & Technology: Java, ADF, JDeveloper 11g, 12c, Jenkins(Devops), SVN, RPA UI Path Automation

Description: ABSA stands for Amalgamated Bank of South Africa, which provides insurance to customer. Advisors are brokers who work for ABSA, sells ABSA and non-ABSA insurance policies and receive commission.

ABSA AFS is a portal application where ABSA advisors sell and distribute ABSA and Non ABSA Insurance products for clients

Key Result Areas:

Implementing end-to-end project, contributing in ABSA AIC Project from requirement gathering, design, development, test, Go live and support

Playing a pivotal role as an active onsite coordinator involved in all functional and technical client meetings, architectural design and solutions discussions

Developing web application with ADF Framework, Webcenter Portal

Executing front-end screen designing using ADF 12c ALTA UI and backend with ADF BC, JAVA, SQL

Managing server admin activities and acting as UAT Build master in project to ensure UAT, PROD environment deployment and stability

Preparing technical specification documents, unit test cases, support and quality documents

Working with the Agile Team with other end systems such as SOA, WBI, ASTI, SIEBEL and CIF

POC Accomplished:
Performed code quality check and exception handling through SONAR QUBE Integration with WebLogic Server
Devops integration for continuous development and deployment using Jenkins, Hudson
Established POC for presentation of ADF 12c front end components and capabilities of 12.2.1 version
