

Amit Kumar 

7 Years of Experience in Oracle PLSQL development

Current Designation: Software Engineer

Total Experience: 7 Year(s) 0 Month(s)

Current Company: Sonata Software LTD.

Notice Period: 15 Days or less

Current Location: Bengaluru / Bangalore

Highest Degree:

Pref. Location: Bengaluru / Bangalore, Delhi / NCR, Pune

Functional Area: IT Software - Application Programming / Maintenance

Role: Software Developer

Industry: IT-Software/Software Services

Marital Status: Married

Key Skills: Oracle PLSQL, SQL, Performance Tuning, Unix, Jenkins

Verified : Phone Number | Email - id

Last Active: 20-Jan-21

Last Modified: 20-Jan-21

Summary

- * Having 6 years of experience as Oracle Developer and 1 years exp in manual testing.
- * Good programming experience in SQL and PL/SQL
- * Development of having good concepts on Oracle Architecture With Performance Tuning.
- * Stored Procedures, Functions and Packages.
- * Good knowledge in writing cursors.
- * Having good experience and knowledge of Exceptions
- * Good knowledge in writing SQL queries according to business rules.
- * Created Tables, Views, Constraints, Index
- * Tuning of the SQL queries according to the requirement.
- * Complex SQL queries using joins, sub queries to retrieve data from the database.
- * Modified Sql statements, procedures and functions
- * Having good knowledge in developing Reports and Forms
- * Having knowledge on Collections
- * Involved in analysis, design, coding and Testing.
- * Having knowledge on materialized views for data replication in distributed environments.
- * Have thorough knowledge and experience of Agile Scrum Methodology.
- * Good experience in design, develo

Work Experience

Sonata Software LTD. as Software Engineer
Oct 2018 to Till Date

- ? Good programming experience in SQL and PL/SQL.
- ? Development of having good concepts on Oracle Architecture With Performance Tuning.
- ? Stored Procedures, Functions and Packages.
- ? Good knowledge in writing cursors.
- ? Having good experience and knowledge of Exceptions
- ? Good knowledge in writing SQL queries according to business rules.
- ? Created Tables, Views, Constraints, Index
- ? Tuning of the SQL queries according to the requirement.
- ? Complex SQL queries using joins, sub queries to retrieve data from the database.
- ? Modified Sql statements, procedures and functions
- ? Having good knowledge in developing Reports and Forms

- ? Having knowledge on Collections
- ? Involved in analysis, design, coding and Testing.
- ? Having knowledge on materialized views for data replication in distributed environments.
- ? Have thorough knowledge and experience of Agile Scrum Methodology.
- ? Good experience in design, development, and execution of Test Cases and Test Reports.
- ? Well acquainted with Software Development Life Cycle (SDLC)
- ? Excellent in performing Functional Testing, Integration Testing, and Regression testing.
- ? Creating technical document like SRS, TEST CASE

Fidelity Investment as Senior Software Engineer

Dec 2017 to Sep 2018

- * Analyzing the requirements.
- * Involved in writing the sql queries.
- * Involved in writing the script for decommission database objects.
- * Writing the complex queries according to business rule.
- * Involved in writing UTPLSQL for unit testing.
- * Creating the procedures and function when it was required.
- * Involved in creating the tables, index, views, synonyms, sequences.
- * Involved in creating the reports by using oracle 12c.
- * Involved in E2E testing in QA, UAT environments.
- * Involved in production support as weekly basis.

Dell International Services as Software Developer

May 2013 to Dec 2017

Organization	:	Dell International Services INDIA PVT LTD
Duration	:	Jan-2015 to Nov-2017
PROJECT NAME	:	CPF(CASH PASPORT FACTORY)
CLIENT	:	MASTERCARD, UK
Database	:	Oracle 11g
Tools	:	Toad, Git, Jenkins, Udeploy,Stash
O.S	:	Window7

Project Description:

The CPF applications are designed to be the central repository for all Card Program related reference data. The CPF can be used by the business to set up Card Programs, assign groups of attributes (Packages) to Programs, set up Clients within the Client Hierarchy and assign ProgramsPackages to Clients. A number of applications support the card program including the Card Processor's Portal, Client developed interfaces with the Card Processor, Card Vendor systems and other TravelerClient applications such as Fox web. When the reference data has been updated by the business and the approval process completed, CPF sends the reference data to the Card Processor who process the data and updates the card scheme following the agreed process. When the business has confirmed the live date for the updated data, RD interfaces with the ODS IT work stream. This application is used by various MasterCard's client like British Airways, ENBD, Sainsbury bank and etc.

ROLE : TEAM MEMBER

- * Analyzing the requirements and getting the required clarifications from BA
- * Involved in writing the sql queries.
- * Writing the complex queries according to business rule.
- * Creating the procedures and function when it was required.
- * Involved in creating the tables, index, views, synonyms, sequences.
- * Involved in creating the reports by using oracle 11g.
- * Involved in developing scripts for the support activities.
- * Prepare Weekly status Report for test activities and involve in Functional test execution and database validations;

Execute test cases, perform tasks related to bug tracking

- * Took responsibility of training new joiners
- * Involved in Debugging the Defects.

ORGANIZATION	:	DELL INTERNATIONAL SERVICES INDIA PVT LTD
DURATION	:	APRIL 2013 TO DEC 2014
PROJECT NAME	:	GLOBAL DATA GATEWAY (GDG)
CLIENT	:	EXPERIAN, UK
DATABASE	:	ORACLE 11G
TOOLS	:	FILEZILLA,VERSION ONE, SQL DEVELOPER
O.S	:	WINDOW7

Project Description:

GDG is a centralized Global Data Gateway repository to collect business identity and available corporate linkages from BIG Net, UK, US, and potentially other global partners and to collate and compile the information into a central repository that will assign and store a Global Business Identification Number as well as cross-references to the contributing country of origin's business match identifier. Also accept requests for global corporate linkage information and deliver Experian global corporate linkage responses in real time web services and batch services. To develop this application we have 5 different stages such as REFORMATTER, VALIDATION, SPLIT, CHANGE DETECTION, and DATALOAD.

ROLE: TEAM MEMBER

- * Analyzing the requirements and getting the required clarifications from BA
- * According to the requirement involved in creating the tables.
- * Involved in developing scripts for the support activities.
- * Doing update, alter and retrieving the data for business rule.
- * Retrieving the data from multiple tables by using join operation.
- * Creating the procedures and function when it was required.
- * Support Release activity required of the application.
- * Resolution Automation and Monitoring implementation.
- * Defect Analysis and tracking using
- * Testing new features and submitting the report to Project Manager
- * Functional and compatibility testing of Different Scenarios
- * Assist with a preparation of test plan.
- * Involved in Regression testing, Execution Report
- * Involved in writing SQL queries for different Scenarios.
