Work Experience

Deloitte as Senior Analyst III

Oct 2019 to Till Date

TCM- Tax Controversy Manager OCT 2019 - Present

Role: Senior Analyst III (Employer - Deloitte.)

Description of the project

TCM is a web application built on MVVM Design pattern helps tax practitioners to file / store the records of tax forms for that particular audit cycle. They can upload documents where a email service will be triggered when an audit document is created. Reports will be generated for audit cycle records and send to end user by mails using SMTP scheduled service. Mobile messages will be send to the end users using Twilio SMS service.

Wells Fargo EGS as Apps System Engineer

Aug 2018 to Oct 2019

PAICE - Print Audit Information AUG 2018 - OCT 2019

Collection Engine

Role: Application Developer (Employer - Wells Fargo EGS Ltd)

Description of the project:

PAICE is intended to discover all printers on the retail stores network and then feed the data to HP site. The EUC group has a new initiative to outsource some of the retail stores printer management functions to HP for 23000 plus devices.

Tata Consultancy Services as System Engineer

Feb 2014 to Jul 2018

British Telecom - Wholesale

FEB 2014 - JUL 2018

Online Ordering System

Role: Application Developer (Employer - TCS Ltd)

Description of the project:

British telecom - Wholesale is the Europe's largest wholesale communications business by revenue and market. Its business serves fixed and mobiles service providers, internet service providers, communications services resellers and global broadcasters and TV production companies with the widest range of services available from a wholesale provider, regionally or nationally in the UK or across 170 countries worldwide. It offer a wide range of products such as broadband, voice, cloud services and services on traditional, next generation and IP based networks.

As a part of this project, we have developed two applications. One is an online website, through which the resellers can order products like PSTN lines, SIP Trunking, mobile numbers etc. The other being a console application, where the resellers can call the BT agents, and place their orders. Both of these applications, allows the resellers to place orders on behalf of their customers using our application. It provides the user to configure their product, calculate pricing, allows modifying their product configuration once the product is delivered, ceasing or ending the product contract. The application also allows the customer to raise tickets/faults if the product delivered does not work as per his expectation or if the service does not work as expected.

Responsibilities:

- Involved in requirement analysis and application design, experienced in coordinating with multiple teams.

- Currently working in Devops culture which is the future of any software developer.

- Involved in creation of technical documentation for application designs.

- Worked closely with the end customers in fixing the issues of live application.

- Involved in creating prototypes for new products that are yet to be launched.

- Development of web application using ASP.net, C#.net, MVC, MVVM and Visual studio.

- Involved in code review and performance tuning.

- Working as lead developer for an year. Responsible for development, maintenance and support of the applications.

- Served as the lead for UI revamp team.

- Cross browser compatible development and testing for various versions of IE (8, 9, 10, and 11), Safari, Chrome, Edge, EdgeChromium and Firefox.

- Worked on creation of unit test cases.
