Work Experience

Cerner as Associate Senior Software Engineer
Oct 2019 to Till Date

Analyzing, designing, developing, implementing and maintaining application code in a variety of contexts including existing applications
Tested troubleshooting methods devised innovative solutions, and documented resolutions for inclusion in knowledge base for support team use.
Researched, designed and implemented scalable applications for information identification, extraction, analysis, retrieval and indexing.
Worked with customers for needs analysis, proposal development and vendor costs to produce competitive estimates.
Monitored debugging process results and investigated causes of non-conforming software.
Modified existing windows service software to correct coding errors, upgrade interfaces and improve overall performance.
Developed unit test plans, manages and tests data, including mapping data, coordinating test files, and facilitating data transfer with client.
Installed and configured software applications and tested solutions for effectiveness.

TATA CONSULTANCY SERVICES as Associate System Engineer

Sep 2016 to Oct 2019

Administered, supported and monitored databases by proactively resolving database issues and maintaining servers. Collaborated on all stages of systems development lifecycle, from requirement gathering to production releases. Provided useful enhancements like creating orders in offline mode, automatic and manual of master data in web services database after certain tolerance is reached. Provided root cause fixes for constantly occurring issues/bugs. Excellent communication skills with a strong background working directly with client and coworkers to identify objectives and establish requirements. Carefully documented technical workflows and knowledge in private wiki for education of newly hired employees. Trained and managed team of 8 developers and discussed issues in order to provide resolution and apply best practices. Recognized unprocessed delivery data issues in HODIM software processes and applied automation techniques, bolstering efficiency by 300%. Pioneered new methods of code review to incorporate wider range of voices, enhancing final products with ideas otherwise overlooked. Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs and enhancements. Documented all software development methodologies in technical manuals to be used by trainee engineers in future projects.
