Summary

Identity & Access Management and Siteminder administrator.

Work Experience

TCS as System Administrator Nov 2016 to Till Date

SiteMinder and System Administrator

Installation and configuration of SiteMinder Policy Server R12.8

Installation and configuration of CAdirectory R14.0

Application Integration using CA Access Gateway 12.52/12.8

Installation and configuration of SiteMinder Web Agent on Linux and Windows platforms

Configuring policies in SiteMinder WAMUI as per client requirements

SiteMinder Policy Server upgrade from R12.6 to R12.8

CA SiteMinder Web Agent upgrade from R12.5 to R12.52

Troubleshooting and Root Cause Analysis (RCA) for all the Siteminder / Web related problems. This includes -

Analysing the SMPS trace logs and Web Agent trace logs

Analysing at server level to find if problem lies at network/DB/Load Balancer and escalating the same to respective stakeholders

Created a new SSO Infrastructure environment used internally for performance testing

Deploying applications on Weblogic Server

Handling request for SSO configuration of various applications

Engaging vendor support for CA SiteMinder and CA IdentityMinder

Providing 24*7 support for SiteMinder integrated environments

Leading and involving in System Testing

Application Integration using SAML 2.0/CA Federation

ISC-Information Security Coordinator for our Enterprise Architecture Group

Production Monitoring

Configure monitoring for all Siteminder components including physical server.

Training new team members in the team about Project, System architecture and Components

Co-ordinate with different stakeholders for different issues in production and plan for a solution to that

Process the customer requirements to an agreed scope and maintaining the SLA

Actively supporting application team for Live applications in production on Siteminder

Handling level 3 escalation user issues on mail or tickets

Infrastructure & Maintenance

Responsible for all Infrastructure related issues and end to end Infra maintenance

Patching Plan of all servers which includes Windows, Linux and UNIX to ensure no services are down at a given point of time

Procurement of new Hardware required for existing servers or procurement of new servers

Deploying policy objects from development to production through XPSImport/XPSEExport tool

Important

- Using Free CV Search you have access to featured candidate profiles of Naukri. You can browse through the profiles and email the candidates of your choice directly using the email option provided. To prevent misuse of candidate information, contact details and attached resume of the candidates have been withheld.

Deploying policy server from development to production through the support team
Updating low level and high level design document and other project documents
Involved in L3 level support for 24 x7

Log Management

Configurations and log monitoring of all production servers viz. Linux, Unix are done using Redis, GrayLog, Elastic Search and Logstash
Configurations on Application team servers are also done as per their Log Monitoring Requirement

Additional Responsibilities

On-boarding new applications in Siteminder and providing Authentication, Authorization and SSO services
Use various Policy server tools such as smldapsetup, XPSSConfig, XPSExplorer, XPSSweeper, XPSRegClient etc
Configuring Environment, Host, DSA and Management UI in CA Directory
Configuring server.conf, proxyrules.xml and other files in Access Gateway
Configuring policy server using Smconsole
Creating and maintaining user and group profiles in LDAP Directory server
Maintaining SiteMinder Security zones
Working in Active Directory
Worked on SiteMinder Integrated Windows Authentication (IWA)
Managing the groups and roles for the applications and assigning the users to the groups and roles
Creating the trusted hosts during the webagent and Access Gateway installation
Configured ACO's, HCO's as per applications requirement
Designed the standard operational procedures that help for the future reference
Configured Rules, Realms and Policies as per application team requirements
System Administration, maintenance & monitoring various day-to-day operations
Testing the application before and after installation
Supporting the applications protected by Siteminder
Granting and revoking access privileges to users
Worked with Service requests, changes and Incidents
Action the Emails send by users to the group mailbox

Projects

● Project Title: Identity Access Management

Client: Tata Consultancy Services (Internal)

Nature of Employment: Full Time

Project Location: Mumbai

Role: Network/System Administrator

Duration: Dec 2018 - Till Date

Onsite / Offsite: Offsite

Team Size: 30

Project Details: TCS internal Portal (Ultimatix) provides secure authentication, authorization and SSO implementation to more than 200 applications using CASiteMinder, Federation, CA Access Gateway implementation and password

management capabilities using CA Identity Manager. The SSO components are installed on multiple servers in

management self service capabilities using CA IdentityMinder. The SSO components are installed on multiple servers in order to cater Single Sign On for all applications.

It provides authentication via custom login page as well as using Integrated Windows Authentication capabilities. Custom login page authentication had various business requirements which were implemented using Custom authentication scheme feature of SiteMinder. Customizations are done using Java.

Password Management services like Forgot Password, Change password and Set Secret Questions are implemented using CA IdentityMinder. Also customization of above tasks to satisfy business requirements is done using Java.

Log Management is done using Open Source Tools such as Elastic Search, Logstash, GrayLog, and Redis.
