Projects

Project Title: ROT Integration Stack Harmonization(RISH)

Client: Ness Technologies Pvt Ltd

Nature of Employment: Full Time

Role: Programmer

Duration: Jul 2019 - Sep 2020

Onsite / Offsite: Offsite

Team Size: 5

Skill Used: Tibco Active Matrix Business Works 6.5, Tibco EMS 8.4, TIBCO TEA, ADB adapter, Webservices (SOAP & REST Jason), JMS, Oracle, DB Visualizer, Tortoise GIT, SOAP UI, Postman, Jira, Bitbucket, Confluence, Jenkins, Maven, GEMS.

Role Description: Requirement analysis and prepare design documents (IA490).Development, Unit testing & Deployment in Dev & QA environment.Delivered around 30+ Interfaces in BW6 with Point to Point and Rest over Jason.Delivered 7 Migration from IIB to Tibco.

Project Details: As part of ROT Integration Stack Harmonization (RISH) initiative, Canadian-Tire is converting IBM Integration Bus

interfaces to Tibco 6.5 for incremental/real time integrations. Objective of this project is to eliminate multiple hops of integration (DataStage->IIB->Target systems) by introducing Tibco publishing tables, triggers and adapter (ADBadapter>Tibco6.5>TargetSystem). The project is an ESB framework which forms a middleware to enable integration of systems like order management, shipping, Inventory management for online and instore orders.

Project Title: One Company Promo Planning(OCPP)

Client: Ness Technologies Pvt Ltd

Nature of Employment: Full Time

Role: Programmer

Duration: Jun 2018 - May 2019

Onsite / Offsite: Offsite

Team Size: 5

Skill Used: Tibco Active Matrix Business Works 6.5, Tibco EMS 8.4, TIBCO TEA, ADB adapter, Webservices (SOAP & REST Jason), JMS, Oracle, DB Visualizer, Tortoise GIT, SOAP UI, Postman, Jira, Bitbucket, Confluence, Jenkins, Maven, GEMS.

Role Description: Requirement analysis and prepare design documents (IA490).Development, Unit testing & Deployment in Dev & QA environment.Delivered around 30+ Interfaces in BW6 with Point to Point and Rest over Jason.Delivered 7 Migration from IIB to Tibco.

Project Details: Flyer promotions planning uses a custom-built software application POST. This is a module within a revenue optimization platform called Maestro that also supports regular pricing. Basic price will be published out by POST through API service in Tibco, then drop to a Topic right way and return, then different consumer will create subscriber to subscribe the data and feed into target.

Project Title: Warehouse Management System(WMOS)

Client: Ness Technologies Pvt Ltd

Nature of Employment: Full Time

Role: Programmer

Duration: Mar 2017 - Jun 2018

Onsite / Offsite: Offsite

Team Size: 5

Skill Used: Tibco Active Matrix Business Works 6.5, Tibco EMS 8.4, TIBCO TEA, ADB adapter, Webservices (SOAP & REST Jason), JMS, Oracle, DB Visualizer, Tortoise GIT, SOAP UI, Postman, Jira, Bitbucket, Confluence, Jenkins, Maven, GEMS.

Role Description: Requirement analysis and prepare design documents (IA490).Development, Unit testing & Deployment in Dev & QA environment.Delivered around 30+ Interfaces in BW6 with Point to Point and Rest over Jason.Delivered 7 Migration from IIB to Tibco.

Project Details: The Calgary DC is the first existing DC picked to move to the new Manhattan SaaS WMOS solution. It replenish

stores and fulfill consumer (eCommerce) orders for Marks, SportChek, Atmosphere, Marks commercial banners. WMOS will need to integrate to other systems (such as PMM, DOM, Hybris, SendSuites, Kronos, Data Lake and etc) in order to enable the function. Some existing integration need to be changed, and some new integration need to be created to support this implementation. The data from new Calgary DC warehouse management system will flow to Data Lake to support reporting and future advanced analytical.
