Summary

Software engineer with experience in Enterprise Application Integration to focus on application integration and business process integration by creating various interfaces using webMethods.

Skills ? Knowledge on webMethods code (designer), JDBC Adapter, Java flow services, TN Profile, IS, MWS, JMS, CSM based request and response, Rest services, SOAP-based WSDL services, putty, WinSCP.

Troubleshooting and debugging skills ? to identify and fix the issues over code/interface level

Work Experience

Wipro as Webmethods Developer

Jun 2018 to Till Date

As a webMethods developer, I was responsible for end to end delivery of projects on time without any issues, which include task to check on dependency over the system level as various heterogeneous systems can be integrated using webMethods.

? As a developer I was responsible for understanding the complete requirement of interface as it may have many dependencies with existing systems.

? Supported testing for the project along with the testing team to identify and resolve the bug.

? Have prepared the Low Level Design document for the project and have given the handover KT to Production team for the Production Support and help them in deploy the project in production server.

? Wrote test cases for created interface to check positive and negative scenarios.

? Tested the interface in webMethods layer to ensure the code quality is betterment.
