- * Represented Prototype team on Business discussions, Tech grooming and design flow to deliver the functional prototypes as per the Prototype and accessibility standards and to provide inputs on the layout and UX Design.

- * Extensively used all the components, templates, forms, CSS style guide from prototype standards for developing interactive and functional PlanFocus Prototypes.

- * Used ARIA attributes to make the web pages complaint as per ADA standards (for screen reader support).

- * Developed the front end interactive and functional prototypes using HTML, CSS, JavaScript, JQuery, Mustache and PHP.

- * Worked with development team to implement UI and create enhancements to optimize user experience.

- * I had good understanding on business goals, objectives, site functionality and code standards.

- * Revised, refactored and maintained existing code with an emphasis on improving performance, security and readability.

- * Tested of websites for W3C validation and testing it in major browsers like Firefox, IE and Chrome.

- * Developed non-functional HTML, CSS pages (POC's) from the mock ups and involved in UI review with UI architect and Business Units.
- * Developed functional HTML, CSS pages (POC's) from the existing applications to make it responsive with the use of Bootstrap.
- * Assist with walk-throughs and usability testing and provided support across all phases of software QA testing (IT, ST, AT & UAT).
- * Responsible for converting our Global CSS files into SASS files with SASS Preprocessor.
- * Knowledge of converting existing HTML applications into AngularJS pages with Modules, Controllers, Services, Factory, StateProvider, RouteProvider, Directives and custom directives.
- * Implemented various Validation Controls for form validation and implemented custom validation controls with JavaScript validation controls.
