Summary

- * Technocrat with commendable experience of 8.1 years in end-to-end design, development, deployment, support, enhancement & delivery of Software (Mbbile/Web) Applications using Browser-Side (UI) and GCP/Qlik Sense/Node.js/Java technologies/platforms
- * Comprehensive knowledge of:
 - o Artificial Intelligence and Machine Learning platforms to develop Chatbot/Dialogflow and Optical Character Recognition (OCR) applications
 - o AngularJS 1.5, Angular 7, Bootstrap, Html5, CSS3, JavaScript, Typescript, CoffeeScript, Adobe Analytics API, Cognitive APIs, JSON, Google Cloud Platform (GCP) & Amazon Web Services (AWS)
- * Expertise in managing the Software Development Lifecycle (SDLC) using the Agile (Scrum/Sprint) framework right from requirement analysis, documentation, coding and testing, release & deployment, including post deployment maintenance of solutions

Work Experience

Vodafone Shared Services India as Deputy Manager Jan 2019 to Oct 2020

- * Interfacing with stakeholders for gathering business needs, analyzing & reviewing business, functional and high-level technical requirements and finalizing technical/functional specifications and high-level design documents
- * Working on full lifecycle implementation of projects including business blueprinting, GAP analysis, As-Is & To-Be Analysis solution proposal, functional specification writing and documentation
- * Administering day-to-day activities of the Development Team; providing technical guidance and leadership to fellow team members in area of expertise; developing mechanisms for resolving team conflicts
- * Acting as the primary interface between a specific business/functional area and IT partners, investigating and resolving operational issues with business areas
- * Communicating with internal/external clients to determine specific requirements & expectations and managing client expectations as an indicator of quality
- * Preparing roadmap, test estimation, test plans/ cases/ scenarios for projects and performing integration, test-driven development, configuration management and continuous improvement
- * Supporting production issues and facilitating bug fixing, maintaining stored procedures and executing system enhancements according to user requirements for the application created; participating in daily defect meetings with Project Manager; tracking gaps and suggesting relevant solutions
- * Creating and sharing Daily Status Report (DSR) including key highlights, open defects, number of test cases executed/pending, and so on with Project Manager
- * Training the various use case phrases as per the requirements and integrating the application with the various platforms
- * Providing post-implementation, application maintenance and enhancement support to the client with regard to the software application; ensuring all solutions are scalable, extensible & available from the architecture standpoint
- * Ensuring that best practices for coding, architecture, and security are employed across all applications
- * Attending scrum & retrospective meetings as an active contributor on providing feedback & suggestion to improve the process on Agile
- * Steering attainment of 100% Service Level Agreements as per agreed performance standards; playing an active role in mitigating impediments impacting successful team completion of Release/Sprint Goals
