A technocrat having around more than 6 year's rich experience in Software Development and SQL Database Development/PL SQL development in the IT Sector. Currently associated with Agility E services, Hyderabad as Data Base Developer. Deftness in carrying out software development, SQL Development and SSRS Reporting. Proficiency in end-to-end development of software products. Worked at various levels Developing & Implementation of business applications in Client Server / Relational Database Management environment for Windows Platform.

Very Good working experience on SQL Server Development, in various levels

Very Good Working experience in PLSQL Development.

Created complex Stored Procedures, in various levels.

Created Views and worked extensively with Views.

Very good knowledge on table Functions and Scalar functions.

Work Experience

Agility E Services as Software Engineer

Jun 2017 to Sep 2020

MAJOR PROJECTS HANDLED

Project 1:

Project : FOCiS

Client : Agility E services

Team size : 18 people

Environment : PLSQL (Oracle) Development

Project Description:

FOCiS (Freight operations & customer information system) provide a total control and visibility over supply chain needs.

Agility offers air, ocean and road freight forwarding, warehousing, distribution, and specialized services in project logistics, chemical logistics, and fairs and events. FOCiS has Vendor Management and Order Management tools, this will help to track, evaluate and manage vendors, ensuring that they meet customer expectations.

FOCiS automate entire supply chain and reduce costs by integrating with vendors, customers and third parties via Electronic Data Interchange (EDI).

Responsibilities:

Involved implementing XML processing?

Created complex Stored Procedures, Views, Function.

Generated SQL Queries using necessary join conditions and used indexes efficiently for good performance of queries.

Written simple/ complex queries, Views, stored procedures and Functions.

Optimized the performance of queries with modifications in SQL queries, removed unnecessary columns, eliminated

redundant and inconsistent data, normalized tables and established joins.
Interacted with business team to understand requirements.

APTOnline Ltd. (A Joint venture between TCS and State Governments) as Software Engineer May 2014 to Jun 2017

Project : Horticulture
Client : Horticulture Dept., Government of Andhra Pradesh,
Government of Telangana
Team size : 6 people
Environment : SQL Server 2012, SSRS
Project Description:

The main objective of the Department is to extend Technical services to farmers and to guide farmers in implementation of new Technologies, introduction of new schemes etc.

Horticulture Project deals with the online Registration, Subsidy, Payment and Reports of farmer and crops. The current system in Horticulture is driven manually by Department of Horticulture. Now the proposed system is to make online of every process. Horticulture will gather the requirements from different departments under Department of Horticulture. Department of Horticulture consists of various departments like Base Line Survey, APMIP, SHM, RKVY, ISO POM and State Plan.

Responsibilities:

Collaborating with the team members and senior management to maintain a continuous stream of information regarding the project status and progress.

Created complex Stored Procedures, Views, Function.

Generated SQL Queries using necessary join conditions and used indexes efficiently for good performance of queries.

Written simple/ complex queries, Views, stored procedures and Functions in T-SQL.

Optimized the performance of queries with modifications in T-SQL queries, removed unnecessary columns, eliminated redundant and inconsistent data, normalized tables and established joins.

Creating tabular, matrix, drill-down and drill through reports.

Involving in creating various Drill Down, Drill Through reports and Sub-Reports as per business requirements.

Efficient in building recursive queries using CTEs (Common Table Expressions).

Project : IT IS PORTAL
Position : Database Developer
Team size : 4 people
Environment : Microsoft SQL Server 2005 and MS-Access
Project Description:

This is an Internal Project made for APOnline IS Employees of Desktop Support, System Admin & Network Admin Supports.

The main purpose of this Project is to raise CR's (Change Request) & Tickets. In which L1 (Desktop Support), L2 (System Admin) will work on & PL, TL, IS-Head & SPOC will Approve that CR's.

This Project also maintains the Assets (CMDB) Details like Datacenter, Head Office & Operation Assets.

Maintain Weekly Shift Rota's of IS Employees.

In this Portal Implemented the Latest News Module for Daily News Updating.

Responsibilities:

Involved implementing Schema

Created complex Stored Procedures, Views, Function.

Generated SQL Queries using necessary join conditions and used indexes efficiently for good performance of queries.

Written simple/ complex queries, Views, stored procedures and Functions in T-SQL.

Optimized the performance of queries with modifications in T-SQL queries, removed unnecessary columns, eliminated redundant and inconsistent data, normalized tables and established joins.

Creating tabular, matrix, drill-down and drill through reports.

Involving in creating various Drill Down, Drill Through reports and Sub-Reports as per business requirements.
