Summary

Microsoft Certified Solution Developer with nearly 6 years of experience in requirement, analysis, design and execution, unit testing and support activities in Insurance and Banking domain
 Developed solutions for given technical specifications; installed application software and deployed customizations & contributed to code reviews
 Tested modules developed by the team to ensure the same are as per desired quality standards
 Extensive development experience in .Net, MVC, C# and provided application and environment support
 Liaised with stakeholders during the course of problem diagnoses, requirements gathering, detailed level design, development, test and production implementation to ensure that optimal resolutions were achieved
 Understood process requirements and provided use cases for business, functional & technical requirements

Work Experience

Wipro Ltd as Software Developer
 Oct 2014 to Till Date

Key Result Areas:

Developing software solutions by studying information needs, conferring with users, studying systems flow, data usage, and work processes
 Coordinating with onsite counterparts for updates and plan for daily activities; updating daily progress in the scrum ceremonies like Sprint Planning, Grooming and Sprint Review

Contributing in the Software Development Lifecycle (SDLC) right from requirement analysis, documentation (functional specifications, technical design), coding and testing (preparation of test cases along with implementation) to maintenance of proposed applications

Providing support in design of project structure, setup, formulation of code as per project requirements

Conducting Unit Testing of applications; identifying and resolving the bugs in modules

Analysing and modifying existing codes to incorporate changes in the application / user requirements & writing new codes as required

Assisting in determining operational feasibility through analysis, problem definition, requirement analysis, and proposing solutions

Driving efforts towards maintaining software development practices; adhering to company standards for coding and unit/functional test coverage

Communicating with internal/external clients to determine specific requirements and expectations; managing client expectations as an indicator of quality
Upgrading application along with other team members; gathering and understanding business requirements by engaging in the team
Lending technical support to the Application Development Team for testing, troubleshooting and debugging of applications; ensuring timely allocation of appropriate manpower for work

Highlight:
Received appreciation for Landing Page Project from the client as well as the organisation
